BIOSCIENCES**, Volume 18

Presynaptic Receptors

Editors: **S. Z. LANGER**
K. STARKE
M. L. DUBOCOVICH

PERGAMON PRESS

Contents

Preface	xiii
Acknowledgements	xiv
Contributors	xv
A note on terminology for presynaptic receptors. <i>K. Starke and S.Z. Langer</i>	1
Opening Lecture : General views on the relevance of presynaptic receptor systems. <i>U.S. von Euler</i>	5
 SESSION I : PRESYNAPTIC ALPHA-ADRENOCEPTORS AND DOPAMINE RECEPTORS IN POSTGANGLIONIC SYMPATHETIC NEURONS (Chairmen : L. Stjärne and G. Hertting)	
Physiological and pharmacological role of presynaptic receptor systems in neurotransmission. <i>S.Z. Langer</i>	13
The dependence of the presynaptic control of noradrenaline secretion on train length and frequency of nerve stimulation. <i>L. Stjärne</i>	23
Pharmacological differences between the alpha presynaptic adrenoceptors in the peripheral and the central nervous systems. <i>M.L. Dubocovich</i>	29
Comparison of peripheral pre- and post-synaptic dopamine receptors. <i>L.I. Goldberg, J.D. Kohli and J.J. Listinsky</i>	37
Pharmacological modulation of cardiac and central α -presynaptic adreno- ceptors in spontaneously hypertensive rats (SHR). <i>M.J. Antonaccio</i>	43
Evidence for restriction of presynaptic alpha-receptors to the intra- synaptic neuronal membrane. <i>J.A. Bevan</i>	49

Contribution of cardiac presynaptic α -adrenoceptors to the clonidine-induced bradycardia in dogs. <i>A.G. Roach, T. Dennis, B. Scatton and I. Cavero</i>	53
Presynaptic α -adrenoceptors : their pharmacological characterisation and functional significance. <i>G.M. Drew</i>	59
Blockade of α_2 receptors : an explanation for the limited blockade of responses to sympathetic stimulation by some α -adrenergic antagonists. <i>E. Hong and R. Ri6n</i>	67
Structure activity relationships of apomorphine analogs. <i>J.P. Long, D.R. Rusterholz, J.R. Flynn and J.G. Cannon</i>	73
The characterisation of the pre-synaptic receptor activity of drugs. <i>I. Marshall, N.B. Shepperson and P.A. Nasmith</i>	79
Inhibition of cardiac sympathetic neurotransmission in cats by ergot alkaloids. <i>G. Scholtysik</i>	87
Activities of structural analogues of dopamine on prejunctional dopaminergic and alpha adrenergic receptors. <i>O.S. Steinsland and J.P. Hieble</i>	93
Pre- and postsynaptic effects of phenylephrine and tramazoline on blood vessels in vivo. <i>A. Steppeler, T. Tanaka and K. Starke</i>	99
The effect of 6-hydroxydopamine treatment on the binding of ^3H -quinuclidinyl benzilate, ^3H -dihydroergocrypte and ^3H -WB 4101 to rat ventricle membranes. <i>D.F. Story, M.S. Briley and S.Z. Langer</i>	105
Effect of naturally occurring catecholamines on adrenergic neuroeffector interaction in the canine saphenous vein. <i>P. Dalemans, W.J. Janssens, T.J. Verbeuren and P.M. Vanhoutte</i>	111
Pre- and postjunctional α -receptors. <i>J.E.S. Wikberg</i>	117
Discussion	125

SESSION II : PRESYNAPTIC RECEPTORS FOR CENTRAL NORADRENERGIC AND DOPAMINERGIC NEURONS

(Chairmen : G. Bartholini and J.C. Schwartz)

Presynaptic modulation of catecholamine release in the central nervous system : some open questions. <i>K. Starke</i>	129
Presynaptic opiate receptors on catecholamine neurons in brain : possible implication in tolerance and dependence to opioids. <i>J.C. Schwartz, S. De LaBaume, C. Llorens, G. Patey and H. Pollard</i>	137

Dopaminergic feedback regulation of dopamine release in slices of the caudate nucleus of the rabbit. <i>E. Hertting, W. Reimann, A. Zumstein, R. Jackisch and K. Starke</i>	145
Presynaptic inhibitory effect of noradrenaline and dopamine in the central nervous system and the role of membrane ATPase. <i>E.S. Vizi and L.G. Hársing</i>	151
Presynaptic control of dopamine release from striatal dopaminergic terminals by various striatal transmitters. <i>M.J. Besson, M.L. Kemel, J. Glowinski and M.F. Giorguieff</i>	159
Inhibitory effect of diazepam on dopamine synthesis is not dependent on the nerve impulse flow. <i>B. Biswas and A. Carlsson</i>	165
Ponto-geniculo-occipital spikes : a model for the study of the central action of noradrenergic compounds. <i>H. Depoortere and K.G. Lloyd</i>	173
Pre- vs. Post-synaptic receptor control of tyrosine hydroxylase activity : the "long and short" of nigrostriatal feedback loops. <i>K. Gale</i>	179
Different DA receptors controlling dopamine synthesis and tyrosine hydroxylase activity. <i>A.H. Tissari, P.L. Onali, G. Di Chiara and G.L. Gessa</i>	185
Effects of GABA-receptor agonists on the potassium-evoked release of ³ H-GABA from the rat substantia nigra. <i>L. Kamal, S. Arbilla and S.Z. Langer</i>	193
Regulation of the in vivo synthesis of brain dopamine by presynaptic receptors. <i>W. Kehr and G. Debus</i>	199
The influence of GABA on dopamine neuron activity. <i>K.G. Lloyd, P. Worms, B. Scatton, B. Zivkovic and G. Bartholini</i>	207
Biochemical evidence for two types of alpha-adrenoceptors in rat brain. <i>P.J. Miach, J.P. Dausse and P. Meyer</i>	213
Presynaptic receptor-mediated inhibition of noradrenaline release from brain slices and synaptosomes by noradrenaline and adrenaline. <i>A.H. Mulder, J. Wemer and C.D.J. de Langen</i>	219
Lack of presynaptic autoreceptors controlling dopamine release in striatal synaptosomes. <i>M. Raiteri, A.M. Cervoni, R. del Carmine and G. Levi</i>	225
Effect of clonidine on the cerebral adrenaline turnover and the adrenaline release in nucleus tractus solitarii of the rat. <i>B. Scatton, F. Pelayo, M.L. Dubocovich, S.Z. Langer and G. Bartholini</i>	231
³ H-clonidine binding to two α -adrenergic sites in rat CNS : differential effects of 6-hydroxydopamine. <i>D.C. U'Prichard and S.H. Snyder</i>	237

Role of presynaptic receptors in the synthesis and release of dopamine in the mammalian central nervous system. <i>T.C. Westfall, N.A. Perkins and C. Paul</i>	243
The involvement of dopamine postsynaptic and autoreceptors in the regulation of dopamine synthesis. <i>B. Zivkovic</i>	249
Discussion	255
 SESSION III : OTHER PRESYNAPTIC RECEPTOR SYSTEMS (Chairmen : E. Muscholl and P. Hedqvist)	
An adrenaline-mediated positive feedback loop in sympathetic transmission and its possible role in hypertension. <i>M.J. Rand, H. Majewski, M.W. McCulloch and D.F. Story</i>	263
Correlations between acute activation of tyrosine hydroxylase in adrenergic neurons and release of neurotransmitter : implications for a role of cyclic AMP in exocytotic release. <i>N. Weiner, E. Dreyer and F.L. Lee</i>	271
Presynaptic inhibition of transmitter release by adenosine and its antagonism by theophylline. <i>B.B. Fredholm and P. Hedqvist</i>	281
Presynaptic muscarinic control of neuronal noradrenaline release. <i>E. Muscholl, H. Ritzel and K. Rössler</i>	287
Autoregulation of acetylcholine release. <i>J.C. Szerb</i>	293
Effects of propranolol, methysergide and clonidine on the release of ³ H-noradrenaline from the rat cerebral cortex and the cat superior cervical ganglion. <i>E. Adler-Graschinsky and A.E. Martinez</i>	299
Effects of prostacyclin (PGI ₂), 6-oxo-prostaglandin F ₁ α and prostaglandin E ₂ on sympathetic adrenergic nerve function in rabbit mesenteric arteries <i>in vitro</i> . <i>J.M. Armstrong and G. Thirsk</i>	305
Effects of phosphodiesterase inhibitors and cyclic AMP on norepinephrine and dopamine release. <i>L. Cubeddu X., I. Hoffmann and V. Paris V.</i>	311
Evidence for the existence of a presynaptic β-adrenoceptor mediated positive feedback mechanism. <i>C. Dahlöf, B. Ljung and B. Åblad</i>	317
Neurotransmission in the rat portal vein. <i>M.A. Enero</i>	321
Blockade of receptors for 5-hydroxytryptamine on the sympathetic nerves of the rabbit heart. <i>J.R. Fozard</i>	327

Effects of alcohols, anaesthetics and neuroleptics on the noradrenaline release induced by activation of presynaptic nicotine and tryptamine receptors. <i>M. Göthert, U. Dührsen, R. Langefeld and C. Beims-Diekamp</i>	333
Mechanism of PGE and alpha-adrenergic effects on release of catecholamines. <i>Y. Gutman, P. Boonyaviroj and L. Eckstein</i>	341
The role of presynaptic muscarine receptors in regulating acetylcholine release from peripheral cholinergic neurones. <i>H. Kilbinger and B. Wagner</i>	347
Effects of pentobarbital and diazepam on the release of acetylcholine and noradrenaline in the isolated heart. <i>K. Löffelholz, R. Lindmar and W. Weide</i>	353
Are alpha and beta presynaptic receptors involved in mood regulation ? Pharmacological and clinical data. <i>A.J. Puech, Y. Lecrubier and P. Simon</i>	359
Participation of presynaptic and postsynaptic receptors in acetylcholine-catecholamine interactions in cerebral cortex. <i>T.A. Reader, J. de Champlain and H.H. Jasper</i>	363
Sites of action of adenine compounds in the vascular adrenergic synapse. <i>C. Su, H. Tsuru and M.O. Su</i>	371
Modulation of ^3H -norepinephrine release in the rat hypothalamus and cortex by adenosine. <i>A.R. Wakade</i>	377
Discussion	385
Index	389
