

CORROSION-RESISTANT COATINGS TECHNOLOGY

ICHIRO SUZUKI

Contents

Preface	iii
1 Principles of Corrosion Protection by Coatings	1
1.1 Protective Abilities of Coatings	2
References	18
2 Cathodic Control Protection by Sacrificial Metal Coatings	21
2.1 Mechanism of Cathodic Control Protection	22
2.2 Production Methods and Main Products	32
2.3 Protective Ability and Environment	62
References	108

3	Anodic Control Protection by Noble Metal Coatings	115
3.1	Mechanism of Corrosion Protection by Noble Metal Coatings	116
3.2	Production Methods and Main Products	124
3.3	Protective Ability and Environment	137
	References	153
4	EMF Control Protection by Noble Metal Coatings	157
4.1	Mechanism of EMF Control Protection	157
4.2	Production Methods and Main Products	160
4.3	Protective Ability and Environment	161
	References	165
5	Mixed Control Protection by Conversion Coatings	167
5.1	Mechanism of Corrosion Protection by Conversion Coatings	168
5.2	Production Methods and Main Products	174
5.3	Protective Ability and Environment	189
	References	205
6	EMF Control Protection by Organic Coatings	209
6.1	Mechanism of Corrosion Protection by Organic Coatings	210
6.2	Production Methods and Main Products	222
6.3	Protective Ability and Environment	232
6.4	Application	242
	References	246
	Conclusion	249
	Index	251
