

Corrosion Testing Made Easy

Microbiologically Influenced Corrosion

Brenda J. Little, Patricia A. Wagner, and Florian Mansfeld
B.C. Syrett, Series Editor

Contents

1. INTRODUCTION	1
Biofilm Formation	1
MIC Mechanisms	4
Concentration cells	5
Reactions within biofilms	5
Inactivation of corrosion inhibitor	7
Case Histories	7
Ferrous metals	7
Copper and copper alloys	13
Nickel alloys	16
Aluminum and aluminum alloys	17
Titanium and titanium alloys	17
2. MIC SAMPLE IDENTIFICATION AND COLLECTION	19
Examination of a Corroding Metal	19
Sampling	19
Transport	22
3. METALLURGICAL TESTING	23
4. MICROBIOLOGICAL TESTING	29
Specific Microbiological Testing	36
Sulfate-reducing bacteria (SRB)	36
Iron-depositing bacteria	47
5. CHEMICAL TESTING	53
Adenosine Triphosphate (ATP)	53
Polysaccharides, Polyphenols, and Proteins	55
Chemical Elements	58
6. ELECTROCHEMICAL TESTING	61
Basic Instrumentation	66
Potentiostatic Techniques	68
Potentiostatic current vs time at applied potential	71
Steady-state current vs E_{appl}	72
Potentiodynamic Techniques	73
Single sweeps	74
Pitting scans	74

Polarization curves obtained in the vicinity of E_{corr}	76
Polarization resistance measurements	77
Linear polarization	79
Galvanostatic and Galvanodynamic Techniques	80
Open-Circuit Potential Measurements	80
Galvanic Current Measurements	81
7. MONITORS	85
8. RECENT LABORATORY DEVELOPMENTS	89
Microbiological/Biochemical Techniques	89
Electrochemical Techniques	89
Electrochemical impedance spectroscopy (EIS)	89
Electrochemical noise analysis (ENA)	91
Surface Analytical Techniques	95
9. CONCLUSIONS	101
REFERENCES	103
RESOURCE ADDRESSES	107
GLOSSARY	109
INDEX.....	113

CAUTION

The test methods described in this publication may involve hazardous materials, operations, and equipment. This publication does not purport to address all of the safety problems associated with the test methods. It is the responsibility of whoever uses these test methods to consult and establish appropriate safety and health practices and to determine the applicability of regulatory limitations before use.
