Contents

| | |
|--|------------|
| PREFACE | vii |
| ACKNOWLEDGMENTS | ix |
| 1. GENERAL CONCEPTS OF FLOW AND FLOW INSTRUMENTATION | 1 |
| 1.1. The Physical Nature of Flow and the Conservation Laws / 1 | |
| 1.2. Fluid Properties / 2 | |
| 1.3. Fully Developed Flow / 3 | |
| 1.4. Flow Units and Standardization of Flow / 4 | |
| 1.5. Flowmeter Classifications / 4 | |
| 1.6. Inferential Flowmeters / 5 | |
| 1.7. Variable-Area Flowmeters / 10 | |
| 1.8. Direct-Measurement Flowmeters / 16 | |
| 1.9. Energy-Additive Flowmeters / 17 | |
| References / 25 | |
| 2. INFERENCEAL FLOW MEASUREMENT | 27 |
| 2.1. Introduction / 27 | |
| 2.2. Final Control Element Characteristics / 28 | |
| 2.3. Example System / 34 | |
| 2.4. First-Principles Model Development / 36 | |
| 2.5. Kalman Filter / 43 | |
| 2.6. Neural Networks / 50 | |
| 2.7. Conclusion / 56 | |
| Nomenclature / 57 | |
| References / 59 | |

| | |
|--|------------|
| 3. TWO-PHASE FLOW APPLICATIONS | 60 |
| 3.1. Electrical Impedance Probes / 60 | |
| 3.2. Flow Momentum–Drag Body Transducer / 86 | |
| 3.3. Determining Two-Phase Mass Flow Values From Combining Outputs From Two Sensors / 100 | |
| References / 113 | |
| 4. FLOW MEASUREMENTS IN HARSH ENVIRONMENTS | 117 |
| 4.1. Steam Flow Measurement / 117 | |
| 4.2. High-Temperature, Wide-Range Gas Flowmeter / 124 | |
| References / 134 | |
| 5. USING MODELING TO IMPROVE MASS FLOWMETERING ACCURACY | 135 |
| 5.1. Background / 135 | |
| 5.2. An Overview of the Mass Flow Controller / 137 | |
| 5.3. A Typical Mass Flow Controller Design / 143 | |
| 5.4. The Governing Thermal and Hydrodynamic Phenomena of a Mass Flow Controller / 147 | |
| 5.5. Numerical Modeling / 165 | |
| 5.6. Experimental Validation of Modeling Results / 183 | |
| 5.7. Discussion of Results / 191 | |
| 5.8. The Significance of Minor Loss Effects on MFC Performance / 197 | |
| 5.9. Conclusions / 201 | |
| Nomenclature / 202 | |
| References / 203 | |
| 6. FLOWMETER CALIBRATION METHODS | 205 |
| 6.1. Flowmeter Calibration: Terminology and Definitions / 205 | |
| 6.2. Primary Flow Standards / 206 | |
| 6.3. Flowmeters for Use as Secondary Flow Standards / 216 | |
| 6.4. Statistical Analysis of Flow Measurement Errors / 232 | |
| Nomenclature / 235 | |
| References / 236 | |
| 7. A NEW GRAVIMETRIC FLOW CALIBRATOR | 237 |
| 7.1. The Instrument's Field of Application / 237 | |
| 7.2. Principle behind Gravimetric Flow Calibrator / 240 | |
| 7.3. General Considerations for Design of the Gravimetric Flow Calibrator / 241 | |
| 7.4. Design Details / 244 | |
| INDEX | 251 |
