CONTENTS

Preface	vii
List of symbols	xii
Introduction	xv
 <i>Chapter 1. FREQUENCY-DOMAIN BEHAVIOR OF THE ELECTROMAGNETIC FIELD GENERATED BY A MAGNETIC DIPOLE</i>	
Introduction	1
1. Frequency-domain behavior of the electromagnetic field of a magnetic dipole in a uniform conducting and polarizable full-space	1
2. The relationship between amplitude and phase	19
3. The electromagnetic field of a vertical magnetic dipole source on the surface of a uniform conducting half-space	25
4. The electromagnetic field generated by a vertical magnetic dipole source over a conducting half-space which contains a thin conducting plane	59
5. Expressions for the electromagnetic field of a vertical magnetic dipole on the surface of a horizontally layered medium	82
6. Asymptotic behavior of the quadrature component of the magnetic field and the inphase component of the electric field	94
7. Asymptotic behavior of the electromagnetic field	110
8. The electromagnetic field for large induction numbers	150
9. Principles of frequency sounding	162
 <i>Chapter 2. FREQUENCY-DOMAIN BEHAVIOR OF THE ELECTROMAGNETIC FIELD GENERATED BY AN ELECTRIC DIPOLE</i>	
Introduction	213
1. The electromagnetic field of an electric dipole in a uniform conducting medium	213
2. The harmonic field of a horizontal electric dipole on the surface of a uniform half-space	226
3. Electromagnetic field of an electric dipole on a stratified earth	257
4. Electromagnetic field of an electric dipole on the surface of a medium containing a thin resistant layer	285
 <i>Chapter 3. TIME-DOMAIN ELECTROMAGNETIC FIELDS GENERATED BY A MAGNETIC OR ELECTRIC DIPOLE SOURCE ON A STRATIFIED MEDIUM</i>	
1. Transient field of a magnetic dipole in a uniform full-space	315
2. Transient field of a vertical magnetic dipole source on the surface of a uniform half-space	324
3. Transient field about a vertical magnetic dipole source in the case of a thin conducting sheet	338

4. The early stage of transient coupling about a vertical magnetic dipole source on a horizontally stratified medium	351
5. The late stage of transient coupling from a vertical magnetic dipole source on a horizontally stratified medium	358
6. The transient field from an electric dipole source on the surface of a conducting medium	376
7. Method for calculating transient fields on the surface of a horizontally layered medium	399
8. The effect of finite dimensions for field sources and receivers	408
 <i>Chapter 4. THEORETICAL BASIS FOR THE USE OF INDUCTION METHODS ON THE SEA FLOOR</i>	
Introduction	411
1. The electromagnetic field of a vertical magnetic dipole source at the interface between two conductive half-spaces	411
2. The electromagnetic field of a magnetic dipole source raised above the interface	422
3. Derivation of expressions for vector potential A_z^* in a horizontally stratified medium	440
4. Electromagnetic field behavior on the sea floor for a two-layer sequence	443
 <i>Chapter 5. DEFINITION OF APPARENT RESISTIVITY AND THE INTERPRETATION OF SOUNDINGS</i>	
Introduction	451
1. Apparent resistivity curves for a uniform half-space	458
2. Apparent resistivity curves for a two-layer sequence, and interpretation	465
3. Interpretation of H-type apparent resistivity curves	487
4. Interpretation of type A apparent resistivity curves	509
5. Interpretation of type K apparent resistivity curves	517
6. Interpretation of type Q apparent resistivity curves	533
7. Equivalence in apparent resistivity curves	545
8. Graphical methods for constructing transient apparent resistivity curves	551
 <i>Chapter 6. COMPUTER-ASSISTED INTERPRETATION AND INVERSION</i>	
Introduction	559
Iterative and inversion processes	571
 <i>Chapter 7. ACQUISITION AND PROCESSING OF ELECTROMAGNETIC SOUNDING DATA</i>	
Introduction	587
The use of synthetic soundings	589
Considerations in source design	597
Receiver design	610
Compensation of instrumental distortion	617
 <i>Chapter 8. APPLICATIONS OF ELECTROMAGNETIC SOUNDING METHODS</i>	
Introduction	621
Northern Alaska Permafrost survey	621
Electrical exploration for oil and gas	629
Krafla survey	641
Long line experiment	652
Northwest Nevada case history	661
Geysers case history	670
References	679
