

ENGINEERING DESIGN METHODS

Strategies for Product Design

Second Edition

NIGEL CROSS

Contents

Acknowledgements	vii
Introduction	ix
1 The Nature of Design	1
Design Activities	1
Design Problems	10
Design Ability	16
2 The Design Process	19
Descriptive Models	19
Prescriptive Models	24
Systematic Procedures	31
3 Design Methods	33
What are Design Methods?	33
Creative Methods	37
Rational Methods	44
4 Clarifying Objectives	49
The Objectives Tree Method	50
Procedure	50
Summary	54
Examples	54
5 Establishing Functions	65
The Function Analysis Method	66
Procedure	66
Summary	69
Examples	69
6 Setting Requirements	77
The Performance Specification Method	78
Procedure	78

	Summary	81
	Examples	82
7	Determining Characteristics	91
	The Quality Function Deployment Method	92
	Procedure	92
	Summary	97
	Examples	98
8	Generating Alternatives	105
	The Morphological Chart Method	106
	Procedure	106
	Summary	108
	Examples	109
9	Evaluating Alternatives	121
	The Weighted Objectives Method	122
	Procedure	122
	Summary	129
	Examples	130
10	Improving Details	145
	The Value Engineering Method	146
	Procedure	146
	Summary	151
	Examples	152
11	Design Strategies	165
	What is a Design Strategy?	165
	Frameworks for Action	169
	Strategy Control	171
	Exercises: Choosing Strategies and Tactics	172
	References and Sources	175
	Index	177
