Preface	xi	
1	Introduction	
	<i>Gary A. Evans and Jacob M. Hammer</i>	
I.	Background	1
II.	Surface-Emitting Lasers	3
III.	High Power	6
IV.	Applications	7
V.	The Future	7
	References	8
2	Review of Edge-Emitting Coherent Laser Arrays	9
	<i>Stephen R. Chinn</i>	
I.	Introduction	9
II.	Parallel (Evanescent) Coupling	12
III.	Leaky-Mode Coupling	36
IV.	Diffraction Coupling	40
V.	Y-Branch Arrays	47
VI.	Thermal, Non-Ideal, and Temporal Effects	53
VII.	Conclusion	56
	Acknowledgments	57
	References	57

3	Vertical Cavity Surface Emitting Lasers and Arrays <i>Kenichi Iga and Fumio Koyama</i>	71
I.	Introduction	72
II.	Expected Performances of Vertical Cavity Surface Emitting (SE) Lasers	76
III.	Fabrication and Lasing Characteristics of GaInAsP/InP SE Lasers	87
IV.	Fabrication and Lasing Characteristics of GaAlAs/GaAs SE Lasers	93
V.	Superlattice, Periodic, and Multilayer Structure	103
VI.	Two-Dimensional SE Laser Array	109
VII.	Conclusion	111
	Acknowledgments	111
	References	112
4	Grating-Outcoupled Surface Emitting Semiconductor Lasers <i>Gary A. Evans, Nils W. Carlson, Jacob M. Hammer and Jerome K. Butler</i>	119
I.	Introduction	119
II.	Basic Concepts and Operating Principles	120
III.	Design Considerations	136
IV.	Fabrication	179
V.	Experimental Results and Discussion	185
VI.	Conclusion	203
	Acknowledgments	207
	References	208
5	Horizontal-Cavity Surface Emitting Lasers with Integrated Beam Deflectors <i>Richard C. Williamson, Joseph P. Donnelly, Zong-Long Liao, William D. Goodhue, and James N. Walpole</i>	217
I.	Introduction	217
II.	AlGaAs/GaAs Material System	219
III.	GaInAsP/InP Material System	246
IV.	Conclusions	260
	Acknowledgments	262
	References	262

6	Second-Order Grating Surface Emitting Theory <i>Amos Hardy, David F. Welch, and William Streifer</i>	269
I.	Introduction	269
II.	Second-Order Gratings	273
III.	Two Gratings—One Gain Section	293
IV.	Three Gratings—Two Gain Sections	310
V.	Extension to an Arbitrary Number of Gratings	339
VI.	Appendices	341
	References	346
7	Network Analysis of Two-Dimensional Laser Arrays <i>Robert Amantea and Nils W. Carlson</i>	351
I.	Introduction	351
II.	Theory	354
III.	Experiment	369
	References	376
8	External Methods of Phase Locking and Coherent Beam Addition of Diode Lasers <i>James Leger</i>	379
I.	Requirements for Laser Beam Addition	380
II.	Far-Field Properties	386
III.	Coherence, Lateral Mode Control, and Beam Combining	402
IV.	Conclusions	427
	Acknowledgments	428
	References	428
9	Coherence and its Effect on Laser Arrays <i>Michael Lurie</i>	435
I.	Introduction to Coherence	435
II.	The Far Field of a 1-D Array of Emitters Having Arbitrary Coherence Plus Phase and Intensity Variations	441
III.	Far-Field Properties of Coherent and Incoherent Two-Dimensional Arrays	457
IV.	Measurements of Coherence	460

V.	Summary	464
	References	465
10	Microchannel Heat Sinks for Two-Dimensional Diode Laser Arrays	467
	<i>James N. Walpole and Leo J. Missaggia</i>	
I.	Introduction	467
II.	Static Thermal Characterization of Microchannel Heat Sinks	470
III.	Numerical Techniques	478
IV.	Longitudinal Diffusion of Heat	479
V.	Theoretical Predictions of Performance	482
VI.	Experimental Measurements	485
VII.	Alternating Directions of Water Flow in Adjacent Channels	490
	References	496
	Index	499
