

HEAT TRANSFER

J. P. Holman

8th

EDITION

INTERNATIONAL EDITION

Preface	xi
List of Symbols	xv
1 Introduction	1
1-1 Conduction Heat Transfer	2
1-2 Thermal Conductivity	6
1-3 Convection Heat Transfer	10
1-4 Radiation Heat Transfer	12
1-5 Dimensions and Units	14
1-6 Summary	19
Review Questions	20
List of Worked Examples	21
Problems	21
Design-Oriented Problems	24
References	25
 2 Steady-State Conduction—One Dimension	 26
2-1 Introduction	26
2-2 The Plane Wall	26
2-3 Insulation and R Values	28
2-4 Radial Systems	29
2-5 The Overall Heat-Transfer Coefficient	33
2-6 Critical Thickness of Insulation	38
2-7 Heat-Source Systems	39
2-8 Cylinder with Heat Sources	41
2-9 Conduction–Convection Systems	44
2-10 Fins	47

2-11	Thermal Contact Resistance	56
	Review Questions	60
	List of Worked Examples	60
	Problems	60
	Design-Oriented Problems	73
	References	75
3	Steady-State Conduction—Multiple Dimensions	76
3-1	Introduction	76
3-2	Mathematical Analysis of Two-Dimensional Heat Conduction	77
3-3	Graphical Analysis	81
3-4	The Conduction Shape Factor	82
3-5	Numerical Method of Analysis	90
3-6	Numerical Formulation in Terms of Resistance Elements	101
3-7	Gauss–Seidel Iteration	104
3-8	Accuracy Considerations	105
3-9	Electrical Analogy for Two-Dimensional Conduction	120
3-10	Summary	121
	Review Questions	121
	List of Worked Examples	122
	Problems	122
	Design-Oriented Problems	137
	References	138
4	Unsteady-State Conduction	140
4-1	Introduction	140
4-2	Lumped-Heat-Capacity System	142
4-3	Transient Heat Flow in a Semi-Infinite Solid	145
4-4	Convection Boundary Conditions	148
4-5	Multidimensional Systems	162
4-6	Transient Numerical Method	168
4-7	Thermal Resistance and Capacity Formulation	177
4-8	Summary	195
	Review Questions	195
	List of Worked Examples	196
	Problems	196
	Design-Oriented Problems	214
	References	216

5	Principles of Convection	218
5-1	Introduction	218
5-2	Viscous Flow	218
5-3	Inviscid Flow	222
5-4	Laminar Boundary Layer on a Flat Plate	225
5-5	Energy Equation of the Boundary Layer	233
5-6	The Thermal Boundary Layer	236
5-7	The Relation Between Fluid Friction and Heat Transfer	245
5-8	Turbulent-Boundary-Layer Heat Transfer	248
5-9	Turbulent-Boundary-Layer Thickness	255
5-10	Heat Transfer in Laminar Tube Flow	257
5-11	Turbulent Flow in a Tube	261
5-12	Heat Transfer in High-Speed Flow	264
5-13	Summary	269
	Review Questions	272
	List of Worked Examples	272
	Problems	273
	Design-Oriented Problems	281
	References	281
6	Empirical and Practical Relations for Forced-Convection Heat Transfer	283
6-1	Introduction	283
6-2	Empirical Relations for Pipe and Tube Flow	285
6-3	Flow Across Cylinders and Spheres	299
6-4	Flow Across Tube Banks	311
6-5	Liquid-Metal Heat Transfer	316
6-6	Summary Remarks	319
	Review Questions	322
	List of Worked Examples	322
	Problems	323
	Design-Oriented Problems	332
	References	333
7	Natural Convection Systems	336
7-1	Introduction	336
7-2	Free-Convection Heat Transfer on a Vertical Flat Plate	336
7-3	Empirical Relations for Free Convection	343

7-4	Free Convection from Vertical Planes and Cylinders	345
7-5	Free Convection from Horizontal Cylinders	352
7-6	Free Convection from Horizontal Plates	354
7-7	Free Convection from Inclined Surfaces	356
7-8	Nonnewtonian Fluids	358
7-9	Simplified Equations for Air	358
7-10	Free Convection from Spheres	359
7-11	Free Convection in Enclosed Spaces	360
7-12	Combined Free and Forced Convection	372
7-13	Summary	376
	Review Questions	377
	List of Worked Examples	377
	Problems	379
	Design-Oriented Problems	388
	References	390
8	Radiation Heat Transfer	394
8-1	Introduction	394
8-2	Physical Mechanism	394
8-3	Radiation Properties	396
8-4	Radiation Shape Factor	405
8-5	Relations Between Shape Factors	415
8-6	Heat Exchange Between Nonblackbodies	422
8-7	Infinite Parallel Planes	430
8-8	Radiation Shields	432
8-9	Gas Radiation	436
8-10	Radiation Network for an Absorbing and Transmitting Medium	446
8-11	Radiation Exchange with Specular Surfaces	452
8-12	Radiation Exchange with Transmitting, Reflecting, and Absorbing Media	457
8-13	Formulation for Numerical Solution	462
8-14	Solar Radiation	479
8-15	Radiation Properties of the Environment	484
8-16	Effect of Radiation on Temperature Measurement	486
8-17	The Radiation Heat-Transfer Coefficient	487
8-18	Summary	488
	Review Questions	489

List of Worked Examples	490
Problems	491
Design-Oriented Problems	509
References	515
9 Condensation and Boiling Heat Transfer	517
9-1 Introduction	517
9-2 Condensation Heat-Transfer Phenomena	517
9-3 The Condensation Number	523
9-4 Film Condensation Inside Horizontal Tubes	524
9-5 Boiling Heat Transfer	526
9-6 Simplified Relations for Boiling Heat Transfer with Water	538
9-7 The Heat Pipe	540
9-8 Summary and Design Information	542
Review Questions	544
List of Worked Examples	545
Problems	545
Design-Oriented Problems	550
References	550
10 Heat Exchangers	553
10-1 Introduction	553
10-2 The Overall Heat-Transfer Coefficient	554
10-3 Fouling Factors	559
10-4 Types of Heat Exchangers	560
10-5 The Log Mean Temperature Difference	563
10-6 Effectiveness-NTU Method	572
10-7 Compact Heat Exchangers	587
10-8 Analysis for Variable Properties	590
10-9 Heat-Exchanger Design Considerations	597
Review Questions	597
List of Worked Examples	598
Problems	598
Design-Oriented Problems	608
References	615

11	Mass Transfer	616
11-1	Introduction	616
11-2	Fick's Law of Diffusion	617
11-3	Diffusion in Gases	618
11-4	Diffusion in Liquids and Solids	623
11-5	The Mass-Transfer Coefficient	623
11-6	Evaporation Processes in the Atmosphere	628
	Review Questions	631
	List of Worked Examples	631
	Problems	631
	References	634

Appendixes

A	Tables	635
	<i>Table A-1 The error function / Table A-2 Property values for metals / Table A-3 Properties of nonmetals / Table A-4 Properties of saturated liquids / Table A-5 Properties of air at atmospheric pressure / Table A-6 Properties of gases at atmospheric pressure / Table A-7 Physical properties of some common low-melting-point metals / Table A-8 Diffusion coefficients of gases and vapors in air at 25°C and 1 atm / Table A-9 Properties of water (saturated liquid) / Table A-10 Normal total emissivity of various surfaces / Table A-11 Steel-pipe dimensions / Table A-12 Conversion factors</i>	
B	Exact Solutions of Laminar-Boundary-Layer Equations	655
C	Analytical Relations for the Heisler Charts	661
D	Heat-Transfer Software	667
	<i>D-1 Introduction / D-2 Setting up the programs / D-3 Documentation of the twelve programs / Problems using heat transfer software</i>	

Index	689
