Contents

Groundwater and Surface Water Pollution 1

1 Principles of Groundwater Flow 5

- 1.1 Groundwater and Aquifers 5
- 1.2 Fundamental Equations of Groundwater Flow 10
- 1.3 Confined Aquifers 12
- 1.4 Unconfined Aquifers 16
- 1.5 Combined Confined and Unconfined Flow 19

2 Hydraulics of Wells 21

- 2.1 Two-dimensional Problems 21
- 2.2 Nonsteady (Transient) Flow 26
- 2.3 Determining Aquifer Characteristics 32
- 2.4 Design Considerations 43
- 2.5 Interface Flow 46

3 Principles of Groundwater Contamination 48

- 3.1 Causes and Sources of Contamination 48
- 3.2 Fate of Contaminants in Groundwater 52
- 3.3 Transport of Contaminants in Groundwater 62

4 Groundwater Investigation and Monitoring 67

- 4.1 Initial Site Assessment 67
- 4.2 Subsurface Site Investigation 75

5 Groundwater Cleanup and Remediation 85

- 5.1 Soil Treatment Technologies 85
- 5.2 Pump-and-Treat Technologies 87
- 5.3 In Situ Treatment Technologies 107

Storm Water Pollutant Management 113

6 Storm Water Pollutant Management 115

- 6.1 Integrated Storm Water Program 115
- 6.2 Nonpoint Source Pollution 117
- 6.3 Best Management Practices 122
- 6.4 Field Monitoring Programs 127
- 6.5 Discharge Treatment 138
