CONTENTS

FOREWORD	v
INTRODUCTION	1
CHAPTER ONE. — <i>History</i>	7
CHAPTER II. — <i>Ageing of the retina and macula</i>	15
Introduction	15
Characteristics of ageing	16
Development of the macula	19
Ageing of the macula	21
Age-related macular pathology	27
Influence of light	30
Conclusion	33
CHAPTER III. — <i>Aetiology and pathogenesis</i>	35
Ageing degeneration continuum theory	36
Genetic theories	43
Non-genetic theories	46
Subretinal angiogenesis	55
Conclusion	62
CHAPTER IV. — <i>Angiogenesis</i>	63
CHAPTER V. — <i>Experimental models</i>	71
Experimental model	71
Experimental methods	72
Study of photocoagulation-induced SRNV	74
Aetiology and pathogenesis of induced SRNV	78
Cellular biology of SRNV	80
Conclusion	83
CHAPTER VI. — <i>Pathological anatomy</i>	85
Evolution of ideas and history	85
Histopathological aspects	90
CHAPTER VII. — <i>Epidemiology</i>	121
General	121
Prevalence of ARMD	122

Risk factors for ARMD	126
Risk factors for the various forms of the disease	131
Retrospective and statistical study of risk factors (Créteil)	135
Conclusion	139
CHAPTER VIII. — <i>Functional explorations</i>	141
Functional alterations in the main clinical forms	142
Function tests in ARMD	145
Visual function and risk factors for progression	150
Conclusion	150
CHAPTER IX. — <i>Drusen</i>	153
Definitions and history	153
Origin and pathogenesis	155
Epidemiology	159
Clinical aspects	162
Course and complications	178
Conclusion	189
CHAPTER X. — <i>Age-related atrophic macular degeneration</i>	191
Aetiology and pathogenesis	191
Histopathology	194
Epidemiology	196
Clinical and angiographic aspects	196
Differential diagnoses	202
Course and prognosis	204
Therapeutic approach	207
Conclusion	208
CHAPTER XI. — <i>Age-related exudative macular degeneration (subretinal neovascularization) (General)</i>	209
Classification	210
Aetiology and pathogenesis	210
Macular localization	211
Conclusion	212
CHAPTER XII. — <i>Visible subretinal neovascularization</i>	213
Clinical aspects	213
Spontaneous course	230
Conclusion	239
CHAPTER XIII. — <i>Occult subretinal neovascularization</i>	241
Aetiology and pathogenesis	241
Epidemiology	242
Clinical features	243
Spontaneous course	249
Associated diseases	255
Conclusion	258
CHAPTER XIV. — <i>Pigmentary epithelium detachment</i>	259
Pathogenesis	259
Epidemiology	263
Clinical features	264
Spontaneous course	279
Tear of the pigmentary epithelium	285
Conclusion	303
CHAPTER XV. — <i>Advanced forms</i>	305
Predominantly atrophic forms	305
Predominantly exudative forms	306

Predominantly fibrous forms	308
Fibrovascular forms	310
Predominantly haemorrhagic forms	314
Conclusion	318
CHAPTER XVI. — Other age-related macular degenerations	319
<i>Macular holes</i>	319
Epidemiological features	319
Clinical features	320
Differential diagnoses	323
Course and prognosis	324
Treatment	327
Macular holes associated with age-related macular degeneration	328
Pathogenesis	328
Conclusion	330
<i>Age-related or idiopathic epiretinal macular membranes</i>	330
Clinical and angiographic aspects	331
Histological aspects	334
Origin of cells and natural history	335
Surgical treatment	338
Conclusion	340
<i>Acquired vitelline macular degeneration in adults</i>	340
History and classification	341
Epidemiology	342
Clinical features	344
Course	349
Histopathology	352
Physiopathogenesis	353
Differential diagnosis	354
Conclusion	356
CHAPTER XVII. — Laser photocoagulation	357
Theoretical basis	358
Techniques	363
Mechanism of action	372
Indications	372
Results	374
Complications	395
Recurrence and persistence of neovascularization	398
Conclusion	412
CHAPTER XVIII. — Rehabilitation with optic aids	413
Optic aids	413
Hypernegative implants	422
Conclusion	428
CHAPTER XIX. — The so-called preventive and restorative treatments	431
Medical treatments	431
Protection against light radiations	436
Future prospects : grafts, transplantations, cell replacements	441
CONCLUSION	445
BIBLIOGRAPHY	449
SUBJECT INDEX	487
