

FLIGHT-VEHICLE
MATERIALS,
STRUCTURES, AND
DYNAMICS —

ASSESSMENT AND FUTURE
DIRECTIONS

VOL.

3

Contents

Preface	v
Chapter 1 Ceramics and Ceramic Composites in Future Aeronautical and Space Systems	1
<i>Stanley R. Levine</i>	
Chapter 2 Monolithic Ceramics	19
<i>Thomas P. Herbell and William A. Sanders</i>	
Chapter 3 Toughened Ceramic Composites: Second-Phase Particulates, Transformation Toughening, and Whisker Reinforcement	43
<i>Terry N. Tieg, Mattison K. Ferber, and Paul F. Becher</i>	
Chapter 4 Polymeric Precursors for Fibers and Matrices	59
<i>Frances I. Hurwitz</i>	
Chapter 5 Glass-Ceramic-Matrix Fiber Composites	79
<i>Richard L. Lehman</i>	
Chapter 6 Reaction-Bonded Si_3N_4 and SiC Matrix Composites	101
<i>Ramakrishna T. Bhatt and Donald R. Behrendt</i>	
Chapter 7 Chemical Vapor Infiltrated Composites	113
<i>Philip J. Geoghegan</i>	
Chapter 8 Sol-Gel Processing of Ceramic Composites	139
<i>Gail H. Cullum</i>	
Chapter 9 Fabrication and Properties of Fiber-Reinforced Ceramic Composites Made By Directed Metal Oxidation	151
<i>Gerhard H. Schiroy, Ali S. Fareed, Birol Sonuparlak, and C. T. Lee</i>	
Chapter 10 Environmental Durability of Ceramics and Ceramic Composites	165
<i>Dennis S. Fox</i>	

Chapter 11		
Fracture Characteristics of Ceramic-Matrix Composites		177
<i>A. G. Evans</i>		
Chapter 12		
Fatigue of Fiber-Reinforced Ceramic Composites		193
<i>John W. Holmes</i>		
Chapter 13		
Creep and Creep Rupture of Ceramic-Matrix Composites		239
<i>S. M. Wiederhorn</i>		
Chapter 14		
Structural Design Methodologies for Ceramic-Based Material Systems		265
<i>Stephen F. Duffy, Abhisak Chulya, and John P. Gyekenyesi</i>		
Chapter 15		
Joining of Ceramics and Ceramic-Matrix Composites		287
<i>James D. Cawley</i>		
Chapter 16		
Carbon-Carbon Composites		307
<i>Howard G. Maahs</i>		
Reference Guide		333
Acknowledgments		363
