CONTENTS

Preface xv

1 Soldering 1

1.1 Introduction / 1
1.2 History / 2
1.3 Base Metals / 4
Reference List: Solderability of Metals / 8
1.4 Solders / 8
1.4.1 Solder Paste / 15
Identification of Solder Pastes / 17
Hints for Handling Solder Paste / 17
1.4.2 Forms of Commercially Available Solder / 18
1.5 Flux / 18
1.6 Intermetallic Compound Layer / 26
1.7 Creation of the Solder Joint / 30
1.8 Soldering Methods / 35
1.8.1 Wave Soldering / 36
1.8.2 Reflow Methods / 39
Vapor Phase / 39
Infrared Heating / 39
Laser / 40
1.9 Through-Hole Technology / 40
1.10 Surface Mount Technology / 41
1.10.1 Short Dictionary of IC Packages / 44
1.10.2 Nomenclature of Vias / 44
1.10.3 Comparison of the Solderable Area / 44
1.11 The Process / 45
1.11.1 Base Metals / 48

Printed Circuit Board / 48
Components / 49
Machine / 49
Copper Circuitry / 49
Component Leads / 51

1.11.2 Solders / 52

Reference List: Solders / 54

1.11.3 Flux / 56
1.11.4 Solder Pastes / 61

1.12 Soldering Procedures / 64

1.12.1 Soldering with the Soldering Iron / 65
1.12.2 Wave Soldering / 69
1.12.3 Reflow / 77

Infrared Heating / 78
Infrared Ovens / 78
Vapor Phase / 80
Laser / 81

1.12.4 Alternatives / 82
1.12.5 Choice of Machine / 83

Performance / 84

1.13 Control of the Process / 85

1.13.1 Control / 87
1.13.2 Tests / 88
1.13.3 Solder Defects / 94

Short Dictionary of Solder Defects / 94
Baking of PCB / 97

1.13.4 Pull Test / 99
1.13.5 Sectioning (Cuts) / 99

1.14 Remarks on Chemicals / 100
1.15 Safety and the Environment / 100

2 Surface Mount Technology **103**

2.1 Introduction / 103

2.1.1 Advantages / 103
2.1.2 Disadvantages / 105
2.1.3 Nomenclature of Vias / 107
2.1.4 Components (Surface Mounted) / 108
2.1.5 General Guidelines for Handling Electrostatically Sensitive Components / 110
2.1.6 Classification / 110

2.2 Process Flow / 112
2.2.1 Placement / 112
Glue for SM Devices / 116
Needle Transfer / 119
2.2.2 Wave Soldering of SM Assemblies / 119
Manufacturers of Soldering Machines / 126
2.2.3 Solder Paste / 126
Product Identification of a Solder Paste / 130
Tips for Handling Solder Paste / 131
2.2.4 Screen Printing / 131
2.2.5 Paste Deposition by Dispenser / 135
2.2.6 Heating with Infrared / 136
Infrared Reflow Machines / 141
Adjustment and Calibration of IR Machines / 142
Manufacturers of Reflow Machines / 146
2.2.7 Reflow by Laser / 147
Short Dictionary of Laser Terminology / 150
Manufacturers of Laser Machines / 152
2.2.8 Condensation Soldering / 152
Vapor-Phase Liquids / 154
Loss of Liquid / 155
Recovering and Cleaning of Vapor-Phase Liquids / 158
Manufacturers of Vapor-Phase Equipment / 158
2.2.9 Conductive Epoxies / 159
2.3 Inspection of SM Assemblies / 160
2.3.1 Manufacturers of Inspection Systems / 165
Optical Inspection Systems / 165
X-ray Inspection Systems / 165
Laser Inspection Systems / 165
2.3.2 Defects When Flow Soldering SM Assemblies / 166
2.3.3 Defects When Reflow Soldering SM Assemblies / 166
2.4 Reliability of a Soldered Joint / 167
2.4.1 Thermal Expansion / 169
Laminate Materials / 171
Warpage of the PCB and Component Placement / 172
2.4.2 Temperature Cycling / 173
2.4.3 Test of Vibration / 174
2.5 Process Control / 174
2.5.1 Norms / 176

2.6 Repair of SM Assemblies / 178
2.7 Storage of Gases / 181
2.8 Some Addresses / 182

3 Solder Defects **184**

3.1 Introduction / 184
- 3.1.1 Initial Questions / 184
- 3.1.2 Definition of a Defect / 184
- 3.1.3 The Rework Problem / 186
- 3.1.4 Occurrence of Defects / 186
- 3.1.5 Cost Considerations / 188
- 3.1.6 What to do with Defects / 189

3.2 The Process / 190
3.3 Solder Processes / 191
- 3.3.1 Soldering by Hand / 191
- 3.3.2 Flow Soldering / 192
- 3.3.3 Drag Soldering / 193
- 3.3.4 Reflow Methods / 193

3.4 Classification of PCBs / 193
- 3.4.1 One-Sided PCB / 193
- 3.4.2 Plated Through-Hole / 194
- 3.4.3 Surface Mount Technology / 194
- 3.4.4 Mixed Technology / 195

3.5 The Joint / 195
- 3.5.1 Formation of the Joint / 195
- 3.5.2 Appearance of the Surface / 196
- 3.5.3 Discoloration / 197
- 3.5.4 Capillary Action / 197
- 3.5.5 Inner Structure / 198
- 3.5.6 Induced Stress / 198
- 3.5.7 Customer's Perspective / 199

3.6 Evaluation / 200
- 3.6.1 Purpose of the Diagnostic Procedure / 200
- 3.6.2 Repair and Rework / 201
- 3.6.3 Repair Methods / 202
- 3.6.4 Some Aspects of Visual Inspection / 203

3.7 Defects and the Process / 204
- 3.7.1 Single Wave / 204
  - *Defects: Single Wave / 205*

3.7.2 Double Wave / 210
Defects: Double Wave / 211
3.7.3 Reflow Soldering / 213
3.7.4 Infrared Reflow / 214
Defects: Infrared Reflow / 214
3.7.5 Vapor Phase / 219
Defects: Vapor Phase / 219

4 Cleaning **221**

4.1 Introduction / 221
4.1.1 Trends / 221
4.1.2 Reasons for Cleaning / 223

4.2 Alternatives to Cleaning / 225
4.2.1 Mild Rosin Fluxes / 226
4.2.2 Low-Solids Fluxes / 227
4.2.3 N_2 Atmospheres / 228

4.3 Cleaning Considerations / 230
4.3.1 Sources of Contamination / 230
4.3.2 Basic Parameters / 234
4.3.3 Flux / 235
4.3.4 Classification of Residues / 237
Contaminants and Their Possible Effects / 237
Consequences and Mechanisms / 239
4.3.5 Diagnosis / 239
Handling / 240
Environment / 241
4.3.6 Solvents / 241
Definition / 242
Key Properties / 243
Solvency / 243
Strength of a Solvent / 244
4.3.7 General Strategy / 245
Factors When Deciding For or Against Cleaning / 245
4.3.8 Underlying Concerns / 247
Technical Considerations / 247
Compatibility / 248
Compatibility of Solvents with Metals / 248

4.4 Cleaning Methods / 249

4.4.1 Cleaning with Water / 249

Cleaning with Water Only / 250

Cleaning with Water and Saponifier / 251

4.4.2 Cleaning with Alcohol / 252

4.4.3 Cleaning with Terpenes / 254

4.4.4 Other Cleaning Methods / 256

Semiaqueous Procedure / 256

Aqueous/Alkaline Procedure / 257

4.4.5 Observations / 258

Alcohol and Perfluorcarbon / 258

Alcohol/Water / 259

CO_2 Ice Particles / 259

Appendix A: Flux / 259

Solid Contents / 259

Polymerization of Rosin / 260

Storage / 260

Appendix B: Residues / 261

Sources of Residues / 261

Components and the Printed Circuit Board / 261

Adhesives / 261

Tan Residues / 264

Efficiency of Different Cleaning Methods / 265

Particulate Contamination / 265

Cleaning in Narrow Gaps / 268

High-Pressure Solvent Spray / 270

Spray Pressure in Standard Equipment / 270

Ultrasound / 271

Streaming / 272

Degassing / 272

Cavitation / 272

Appendix C: Cleaning with a Solvent / 273

Activity / 273

Chemical Stability / 273

Compatibility of Solvents with Metal / 274

Compatibility with Materials / 275

Metals / 275

Loss of Liquid / 276

Contamination of Solvents / 280

Common Solvents / 281

Transportation of Chemicals / 281

Solvent Reclamation / 281

Quality / 314
Statistical Quality Control / 315

5.2 Statement of Quality / 315
5.3 Control Functions / 315
5.3.1 Establishment of a Standard / 315
5.3.2 Analysis of Rejects / 317
5.3.3 Inspection / 318
5.3.4 Analysis of Data / 319
5.3.5 Justification / 319
5.3.6 Production Manual / 322

5.4 Statistics / 324
5.4.1 Example / 325
5.4.2 Discrete Distribution / 326
5.4.3 Continuous Distribution / 327
5.4.4 Counting / 327
Permutations / 328
Combinations / 328
5.4.5 Sampling / 330
Sampling Without Replacement / 330
Sampling with Replacement / 332
5.4.6 More About Continuous Distributions / 335
5.4.7 Normal Distribution / 336
5.4.8 Important Parameters / 337

5.5 Hypotheses and Conclusions / 340
5.5.1 Confidence Intervals / 341
5.5.2 Elements of the Hypothesis Test / 342

5.6 Statistics and Control / 343
5.6.1 Random Variable / 344
5.6.2 Central Limit Theorem / 345
5.6.3 Feedback / 345
5.6.4 Cause-and-Effect Diagrams / 346

5.7 Descriptive Statistics / 348
5.7.1 Histogram / 348
5.7.2 Pareto Diagram / 350
5.7.3 Control Diagrams / 352
Averages / 352
Proportions / 353

5.8 Sampling Methods / 353
5.8.1 Simple Procedure / 354
5.8.2 Sequential Procedure / 357
