Contents

Preface		xvii
Acknowledgments		xix
Introduction		xxi
Outline of Material in this Book		xxv
Use of this Book by Different Groups of People		xxvii
Part I	Developing Major Projects: Environmental Controls Via International Purse Strings, Legislation and Special Interest Groups	1
Chapter 1	International Development Organisations	3
	International Funding Agency Project Approval	3
	Ex-Im Bank	4
	The World Bank, (WB)	5
	The International Finance Corporation, (IFC)	7
	The Organisation for Economic Cooperation Fund, (OEFC)	7
	Overseas Development Administration, UK (ODA, UK)	11
	The Environmental Protection Agency (EPA), USA	11
	Other International Lending and Information Agencies	11
	What Did We Learn in this Chapter?	12
	References and Additional Suggested Reading	12
	Appendix 1A: Extracts from Ex-Im Bank's Published Environmental Guidelines and Some Preferred Environmental Product Candidates for Ex-Im Bank Loans	13
	Appendix 1B: The World Bank's Paper on 'Development and the Environment: A False Dichotomy' from World Development Report 1992 (A World Bank Publication)	23
	Appendix 1C: The Japanese OECF: Documentation on their Environmental Guidelines	48
	Appendix 1D: Extracts from the Environmental Guidelines of the ODA's (UK)	77
	Appendix 1E: General Information on the Environmental Protection Agency, USA	81
Chapter 2	The Role of Private Lending Sources in the Economics and Sustainability of Large Projects	83
	Financing by Banks	83
	Financing by Other Means	84

	Obstacles to Project Financing	85
	Foreign Exchange Potential	85
	Revenue Security	86
	Power Tariffs	86
	Return on Investment (ROI)	86
	Approval System and Legal Framework	86
	Economic and Political Stability	87
	What Did We Learn in this Chapter?	87
	References and Suggested Additional Reading	87
	Appendix 2A: BankAmerica In-house Environmental Program	89
Chapter 3	The Role of Governments and Special Interest Groups in the Economics and Sustainability of Large Projects	99
	National Government Legislation and Pressure	99
	The Part Played by Special Interest Groups	99
	Cod in Time (from the Same Issue of Canadian Geographic)	103
	What Did We Learn in this Chapter?	104
	References and Suggested Additional Reading	104
	Appendix 3A: Extracts from Articles on Environmental Debated Issues from Major SE Asian Daily Newspapers	105
Part II	Power Generation	113
Chapter 4	Coal in Power Generation	119
	General Perspective	119
	The Evolution of Specifications	121
	China	121
	Short term and Interim Targets for Power Generation	122
	Emissions in China	122
	NICs and Japan	122
	Emissions from Coal Fired Power	122
	Carbon Dioxide and Global Warming	124
	SO _x , NO _x and Acid Rain	124
	SO _x Limits and Reduction Techniques	124
	Removal/Reduction of Sulphur Before Combustion	124
	Removal of Sulphur After Combustion	124
	Flue Gas Desulphurisation Process	125
	The Flakt Hydro Process	127
	NO _x Reduction	127
	SCR and SNCR	128
	Economics Summary of SO _x and NO _x Reduction	128
	Fly Ash and Particulates	129
	Sample Calculation of Stack Collection Efficiency	129
	New uses for Fly Ash	129
	What does Clean Coal Technology Mean?	130
	Current Clean Coal Environmental Technology for Coal Fired Power	131
	Atmospheric Fluidised Bed Combustion (AFBC)	131
	Pressurised Fluidised Bed Combustion (PFBC)	131

	GCC (Gasification Combined Cycle)	131
	Pulverized Coal	132
	Advanced Steam Technology (AST)	132
	Integrated Gasification Humid Air Turbines (IGHAT)	133
	Blast Furnace Granulated Coal Injection (BFGCI)	137
	CT-121 Scrubbers	137
	Coal Gasification	138
	Commercialising Removal of CO ₂ from Emissions	138
	“Concrete” Solution to the Greenhouse Effect Proposed	138
	What Did We Learn in this Chapter?	139
	References and Additional Reading	140
	Appendix 4A: PFBC	141
	Appendix 4B: SO _x Reduction Techniques: Additional Information	154
Chapter 5	Gas Turbines in Power Generation, as Fueled by Natural Gas, Liquid Fuel or Coal Gas	157
	General Perspective	157
	NO _x Emissions	158
	Internal Hot Section Modifications to Limit NO _x	158
	Sequential Combustion	159
	Water Injection	159
	Coal Gasification	160
	Liquid Natural Gas (LNG)	160
	Combined Cycles	160
	The Role of Ceramics and Carbon Composites in Reducing Emissions	161
	What Did We Learn in this Chapter?	161
	References and Additional Recommended Reading	162
	Appendix 5A: Low NO _x Burners	163
	Appendix 5B: Examples of the Use of Water Injection and Steam Injection in NO _x Reduction and Power Augmentation	174
	Appendix 5C: Combined Cycles and Cogeneration Options	180
	Appendix 5D: Aviation	182
Chapter 6	Economics of Cycle Optimisation and Repowering	189
	Economics and Design Factors	189
	Power and Heat Delivery Requirements	189
	Site Dependent Factors	190
	Capital Parity	191
	What Did We Learn from this Chapter?	192
	References and Suggested Additional Reading	192
	Appendix 6A: Additional Information on Cycle Optimisation	193
Chapter 7	Nuclear Power	205
	General Perspective	205
	Potential for Bad Management in Nuclear Power Production	205

Perspective on the Power of the Press	206
Nuclear Plant used Fuel	208
What Did We Learn in this Chapter?	215
References and Additional Suggested Reading	215
Appendix 7A: Public Information Package Released by Atomic Energy Canada Ltd: 'Nuclear Facts Seeking to Generate a Better Understanding'	217
Appendix 7B: Extracts from: Summary of the Environmental Impact Statement on the Concept for the Disposal of Canada's Nuclear Fuel Waste	228
Appendix 7C: Extracts from Press Articles on Ontario Hydro's Management Problems (1997)	236

Chapter 8 Large Hydroelectric Power Projects 249

General Perspective	249
The Concept of Sustainability with Hydro Power	249
Sedimentation	251
Fish Population	252
Required Resettlement	252
Biodiversity	252
'Lost' or Preempted Land	252
Greenhouse Gas (GHG) Production	253
Downstream Development	253
Regional Lifestyle	253
Design Uniformity and Optimisation	253
Water Quality	254
Primary Assessment of Different Dams	254
Secondary Assessment of Different Dams	255
Public Information	255
Comparing Hydro with Other Forms of Power	256
Comparing GHG in Different Hydro Projects	258
What Did We Learn in this Chapter?	258
References and Additional Suggested Reading	260
Appendix 8A: Quebec Hydro's La Grande Complex Development and its Main Environmental Issues	261
Appendix 8B: When Hydro Power Development Becomes a Predicament	281

Chapter 9 Alternative Fuels 285

General Perspective	285
Cogeneration	285
Combined Heat and Power Projects	285
Combined Cycle Cogeneration	286
Other Waste Heat Recovery Applications	286
Tar Sands (Oil Sands)	286
Shale	286
Trash	286
Hot DeNO _x Process	287
Recapturing Metal from Waste Cars	287
Waste Incineration Fuels Combined Cycle Cogeneration	288

	Energy from Waste Tyres	288
	Geothermal Steam Deposits	293
	Orimulsion	294
	Peat	294
	Biomass	295
	Solid Fuel Gasification	295
	What Did We Learn in this Chapter?	296
	References and Additional Suggested Reading	296
	Appendix 9A: Cogeneration: Additional Information	297
Chapter 10	Regenerative Energy Sources	309
	General Perspective	309
	Wind Energy	309
	Wind Turbine	309
	New Developments in Wind Turbine Generator Design	311
	Wind Power in Terms of a City's Requirements	312
	Small Independent Wind Power Producers	312
	Solar Energy and Photovoltaics	312
	Air Energy	313
	Power Generation Using Air	313
	Using Air Power to Clean Smoggy Air	313
	Small Hydro (Without Silting and Sustainable)	314
	Peat	314
	Biomass	314
	Geothermal Ground Heat	314
	Water (Tide) Energy	314
	What Did We Learn from this Chapter?	315
	References and Additional Suggested Reading	315
	Appendix 10A: Small Commercial and Industrial Applications	317
	Appendix 10B: Agriculture and Aquaculture Applications	326
	Appendix 10C: Remote and Northern Applications	331
	Appendix 10D: International Applications	334
	Appendix 10E: Industry Overviews	339
Part III	Air and Preserving the Atmosphere	347
Chapter 11	Greenhouse Gases, Global Warming and Climatic Change	349
	Introduction to the Greenhouse Gas Effect	349
	Components of the Greenhouse Effect	351
	Carbon Dioxide	351
	Methane	352
	Halocarbons	353
	Ozone	354
	Water Vapour	355
	Comparing the Greenhouse Gases	355
	Contribution of Household Refrigerators to Greenhouse Gases	355
	Global Warming	356
	Sinkholes for CO ₂	357
	Rainfall, Floods and Drought	358

Effect on Coastal Areas	358
Contemporary Technology Initiatives and Legislation Regarding Greenhouse Gases	360
New Technology to Limit CO ₂	362
What Did We Learn in this Chapter?	362
References and Additional Suggested Reading	363
Appendix 11A: Extracts from "Predicting Climate Change and Reconstructing Climate History"	365
Appendix 11B: The Effect of Global Warming on Canada	379
Appendix 11C: Ozone Layer Depletion	388
Appendix 11D: Excerpts from the Report on the 1996 International Workshop on Greenhouse Gas Mitigation Technologies and Measures Report	396
Appendix 11E: Extracts from 'Canada's Second National Report on Climatic Change: Actions to Meet Commitments Under the United Nations Framework Convention on Climate Change'	398

Part IV Soil, Water and Bioremediation 439

Chapter 12 Soil 441

General Perspective	441
Environmental Strategy as Part of Loss Management Strategy	441
Land Reclamation	441
Restoring Soil Quality	442
Curbing Soil Erosion and Botanical Control	442
Microbiological Control	442
What Did We Learn in this Chapter?	442

Chapter 13 Water 443

General Perspective	443
Acid Rain	443
Eutrophication	445
Stray Algae Growth	446
Dredging	446
Models for Water Standards	446
What Did We Learn in this Chapter?	447
References and Additional Suggested Reading	447
Appendix 13A: Water Quality, What an Ecosystem is, A Summation of National Water Resources and National Water Management (all of these with Specific Reference to Canada), International Water Resource Agreements (with Specific Reference to Canada and the US and in Particular, the Great Lakes)	449
Appendix 13B: Extracts from 'First Progress Report under the 1994 Canada-Ontario Agreement Respecting the Great Lakes Basin Ecosystem'	472
Appendix 13C: Extracts from 'Significance and Treatment of Dissolved Solids in Wastewaters from Canadian Steam Electric Stations'	482
Appendix 13D: Extracts from 'Canada - United States Air Quality Agreement Progress Report 1994'	500

Chapter 14	Bioremediation	511
	General Perspective	511
	Power Producers and Bioremediation	512
	Oil and Petroleum Products Remediation	513
	Bioremediation in the Process Industries	514
	The Clean Air Act	514
	How to Clean up Garbage Dumps	515
	Differing Palates Among Bioremediation Microbes	515
	Mining and Bioremediation	515
	Other Catalytic Procedures Used in Bioremediation	516
	Bioremediation and Paint Stripping	516
	Products Made by Microbes	516
	Biosensors	516
	What Microbes are Found in a Sample of Soil?	516
	Bioremediation in Agriculture	517
	Pesticide Substitutes	517
	Preservative and Frost Prevention Bacteria	517
	Food Industry Developments	518
	Cometabolism	518
	What Did We Learn in this Chapter?	518
	References and Suggested Additional Reading	518
Part V	Oil and Gas	519
Chapter 15	Oil and Gas Production	521
	General Perspective	521
	Oil from Tarsands	523
	What Did We Learn in this Chapter?	523
	References and Additional Suggested Reading	523
	Appendix 15A: A Model for Difficult, Long Term Development: Reports from the Oil Sands Development at Syncrude Canada Ltd. in Alberta	525
Chapter 16	Transportation of Oil and Gas	555
	General Perspective	555
	Transportation of Oil and Gas by Pipeline	555
	Oil Spills	557
	Road Transportation	557
	What Did We Learn in this Chapter?	558
	References and Additional Suggested Reading	558
Part VI	Process Industries	559
Chapter 17	Process Industries	561
	General Perspective	561
	Biodegradable Plastic	562
	Processes that Break Down Waste	563
	The Destructor	563
	National Environmental Issues and Indicators	563

Canadian Energy-Related Emissions of Carbon Dioxide (CO ₂)	564
Atmospheric Concentration of Carbon Dioxide (CO ₂)	564
Global Air Temperature	564
Stratospheric Ozone Depletion	566
Canadian Production and Import of Ozone-Depleting Chemicals	567
Stratospheric Ozone Levels	567
Radiation Exposure	568
Levels of Radioactivity in the Air	570
Acid Rain	570
Sulphur Dioxide (SO ₂) and Nitrogen Oxides (NO _x) Emissions	571
Outdoor Urban Air Quality	572
Nitrogen Dioxide (NO ₂) and Carbon Monoxide (CO): Levels in Urban Air and Emissions	573
Sulphur Dioxide (SO ₂) and Total Suspended Particulates (TSP): Levels in Urban Air and Emissions	575
Ground-Level Ozone Concentrations	576
Lead Concentrations in Urban Air	576
Water Freshwater Quality	577
Population Served by Treated Water Supply	579
Municipal Discharge to Fresh Water: BOD (Biochemical Oxygen Demand), TSS (Total Suspended Solids), and Phosphorus	579
Pulp and Paper Mill Discharges to Fresh Water: TSS (Total Suspended Solids) and BOD (Biochemical Oxygen Demand)	581
<i>Discharges of Regulated Substances by Petroleum Refineries to Water</i>	582
Concentrations of Phosphorus and Nitrogen in Water	583
Maximum Observed Concentrations of Pesticides in Water: 2, 4-D, Atrazine, and Lindane	586
Toxic Contaminants in the Freshwater Ecosystem	587
Contaminant Levels in Herring Gull Eggs in the Great Lakes Basin: PCBs (Polychlorinated Biphenyls) and DDE (Dichlorodiphenyldichloroethylene)	588
Contaminant Levels in Lake Trout, a Sport Fish from the Great Lakes Basin: PCBs (Polychlorinated Biphenyls) and DDT (Dichlorodiphenyltrichloroethane)	588
Marine Environmental Quality	590
Municipal Discharges to Coastal Waters: TSS (Total Suspended Solids) and BOD (Biochemical Oxygen Demand)	591
Pulp and Paper Mill Discharges to Coastal Waters: TSS (Total Suspended Solids) and BOD (Biochemical Oxygen Demand)	592
Volume of Significant Marine Spills	593
Area Closed to Shellfish Harvesting	594
Contaminant Levels in Seabird Eggs: PCBs (Polychlorinated Biphenyls)	596
Contaminant Levels in Seabird Eggs: Dioxins and Furans	597

Biota (Living Organisms) Biological Diversity at Risk	599
Wildlife Species at Risk	600
State of Wildlife	600
Levels of Migratory Game Bird Populations	600
Land Protected Areas	602
Land Under Protected Status	602
Urbanization	602
Rural to Urban Land Conversion	603
Solid Waste Management	604
Municipal Solid Waste Disposal Trends	604
Natural Economic Resources Forestry	605
Regeneration Success Versus Total Forest Area	
Harvested	605
Agriculture	605
Changes in Agricultural Land Use	607
Amount of Chemical Fertilizer used and its Associated Nutrient Content	607
Agricultural Pesticide Application on Cultivated Land	608
Fisheries	609
Total Commercial Fish Catches in Canadian Waters off the Atlantic Coast	610
Commercial Fish Harvest in the Great Lakes	612
Water Use	613
Total Water Withdrawal Compared with Growth in Gross Domestic Product (GDP)	613
Rates of Water Withdrawal and Consumption by Key Economic Sectors	614
Rates of Water Recirculation by Key Industrial Sectors	615
Daily Household Water Use Per Capita	616
Energy	616
Total Per Capita Primary Energy Use	617
Emissions of Carbon Dioxide (CO ₂) Per Unit of Energy Consumed	618
Fossil Fuel Intensity of Primary Energy Demand	619
Elements of the Matrix	620
Framework Matrix	621
What Did We Learn in this Chapter?	622
References and Additional Suggested Reading	622
Appendix 17A: Voluntary Action on Toxic Substances	623
Part VII Sustainable Development	633
Chapter 18 Interdependence	635
A Summary thus Far	635
Life Links Between Species	636
Recognising and Developing Resources	636
Reviving Spent Resources	638
Dealing with Buried Toxins	639
Summation	640
What Did We Learn in this Chapter?	640
References and Additional Suggested Reading	641

Chapter 19	Education	643
	Where did you go to School?	643
	Active Responsibility and Proactive Participation	643
	Curricula for a Changing World	646
	Interdependence is an Attitude	646
	Irresponsible Platforming	646
	General Overview for Specialists	647
	The Role of Publishers	647
	Comprehensive University Training	647
	The Media and their Public	648
	Self Education	648
	Status Quo can Mean Hard Work	648
	What Did We Learn in this Chapter?	649
Chapter 20	Choices	651
	General Perspective	651
	Economics-Led Energy System Optimisation	651
	Environmental-Consciousness-Led Choices	651
	What Did We Learn in this Chapter and this Book?	652
	Appendix 20A: Extracts from 'Environmental Externalities for Sustainable Energy'	653
Appendix:	Meanings of Terms and Acronyms	657
Index		665
