## **PART I PHYSICO-CHEMICAL AND BIOLOGICAL INTERACTIONS IN SOIL**

1	Soil Formation and Composition	1
1.1	Introduction	1
1.2	Soil Formation	2
1.3	Phase Composition	5
1.4	Solids Composition and Characterization	13
1.5	Mineral Composition	18
1.6	Role of Composition in Engineering Behavior of Soils	25
	References	28
2	Soil Structure	29
2.1	Introduction	29
2.2	Different Scales of Soil Structure	30
2.3	Pore Sizes Associated with Soil Structure	33
2.4	Single-Particle Arrangements	36
2.5	Gouy-Chapman Theory of the Double Layer	43
2.6	Forces of Interaction Between Clay Particles	47
2.7	Structure Variations due to Consolidation and Compaction	51
2.8	Role of Soil Structure in the Engineering Behavior of Soils	55
	References	58

ix

3	Flow of Water in Soils	61
3.1	Introduction	61
3.2	Energy States of Water in Soil	62
3.3	Principles of Flow in Saturated Soils	66
3.4	Governing Equation for Saturated Flow	79
3.5	Special Cases of Saturated Flow	81
3.6	Principles of Flow in Unsaturated Soils	88
3.7	Governing Equation for Unsaturated Flow	95
3.8	Analytical Solutions of Steady and Transient Flow in Soils	97
	References	108
4	Mass Transport and Transfer in Soils	113
4.1	Introduction	113
4.2	Mass Transport Mechanisms	114
4.3	Mass Transfer Mechanisms	119
4.4	Governing Equation for Mass Transport	137
4.5	Solutions for Special Cases of Mass Transport	139
4.6	Survey of Computer Software for Mass Transport and Transfer Modeling	151
	References	154
5	Nonaqueous-Phase Liquids in Soils	157
5.1	Introduction	157
5.2	Principles of NAPL Entrapment in Soils	159
5.3	Conceptualization of Field-Scale Transport of NAPLs	167
5.4	Phase Diagram for Soil–Water–LNAPL–Air Systems	173
5.5	Modeling Transport of NAPLs in Soils	178
5.6	Mobilization of Residual NAPLs	184
5.7	Mass Transfer Processes	189
	References	195

## PART II CONTAMINATED SITE TREATMENT TECHNIQUES

6	Site Characterization and Contaminant Release Mechanisms	197
6.1	Site Contamination Scenarios	197
6.2	Characterization of Contaminated Sites	200

6.3	Geostatistical Applications	222
6.4	Contaminant Release Mechanisms: Vaporization	226
6.5	Contaminant Release Mechanisms: Dusting	234
6.6	Contaminant Release Mechanisms: Leaching	235
	References	240
<b>7</b>	<b>Technical Basis for Treatment Technique Selection</b>	<b>243</b>
7.1	Identification of Hazardous Wastes	243
7.2	Introduction to Exposure Assessment	249
7.3	Risk-Based Estimation of Required Clean-Up Levels	257
	References	263
<b>8</b>	<b>Principles of Site and Geomaterial Treatment Techniques</b>	<b>265</b>
8.1	Treatment Approaches	265
8.2	In-Situ Versus Ex-Situ Treatment	266
8.3	Basis for Treatment Technology Selection	266
8.4	Pump-and-Treat Principles	269
8.5	In-Situ Soil Flushing	292
8.6	Volatilization and Air Pressurization Principles	293
8.7	In-Situ Vitrification Principles	300
8.8	In-Situ Chemical Treatment in Reactive Walls	306
8.9	Solidification/Stabilization (Ex-Situ) Principles	316
8.10	Ex-Situ Chemical Treatment Principles	329
8.11	In-Situ Natural Attenuation Principles	337
8.12	In-Situ Phytoremediation Principles	345
8.13	In-Situ Bioremediation Principles	350
8.14	Other Techniques	357
	References	357

**PART III WASTE CONTAINMENT**

<b>9</b>	<b>Containment System Implementation</b>	<b>363</b>
9.1	Essentials of Waste Containment	363
9.2	Hydraulic and Physical Containment	368
9.3	Containment Effects on Source Terms	372
9.4	Containment Site Selection Techniques	374
9.5	Containment Site Improvement	380
	References	385

10	Configurations of Containment Systems	387
10.1	Landfills	387
10.2	Slurry Walls	390
10.3	Drainage Trenches and Wells	393
10.4	Surface Impoundments	396
10.5	Grout Curtains	397
10.6	Composite Systems	399
	References	400
11	Elements of Containment System Design	403
11.1	Introduction	403
11.2	Leachate Generation	404
11.3	Water Balance in Waste Containment Systems	406
11.4	Leachate Collection and Removal Systems (LCRS)	419
11.5	Flow and Transport Through Barriers	424
11.6	Stability of Waste Containment Systems	436
	References	449
12	Barrier Composition and Performance	453
12.1	Containment System Performance Elements	453
12.2	System Performance Pattern	454
12.3	Types of Barrier Materials	460
12.4	Material Deterioration Mechanisms	464
12.5	System Performance Monitoring Techniques	477
	References	480
