H. Lichtenegger, and J. Collins

# GPS

**Theory and  
Practice**

Fifth, revised edition

**Springer**WienNewYork

# Contents

Abbreviations	xix
Numerical constants	xxiii
<b>1 Introduction</b>	<b>1</b>
1.1 The origins of surveying	1
1.2 Development of global surveying techniques	1
1.2.1 Optical global triangulation	2
1.2.2 Electromagnetic global trilateration	2
1.3 History of the Global Positioning System	3
1.3.1 Navigating with GPS	4
1.3.2 Surveying with GPS	6
<b>2 Overview of GPS</b>	<b>11</b>
2.1 Basic concept	11
2.2 Space segment	12
2.2.1 Constellation	12
2.2.2 Satellites	12
2.2.3 Operational capabilities	15
2.2.4 Denial of accuracy and access	15
2.3 Control segment	18
2.3.1 Master control station	19
2.3.2 Monitor stations	19
2.3.3 Ground control stations	19
2.4 User segment	20
2.4.1 User categories	20
2.4.2 Receiver types	21
2.4.3 Information services	23
<b>3 Reference systems</b>	<b>25</b>
3.1 Introduction	25
3.2 Coordinate systems	27
3.2.1 Definitions	27
3.2.2 Transformations	30
3.3 Time systems	35
3.3.1 Definitions	35
3.3.2 Conversions	36
3.3.3 Calendar	37

<b>4</b>	<b>Satellite orbits</b>	<b>39</b>
4.1	Introduction .....	39
4.2	Orbit description .....	39
4.2.1	Keplerian motion .....	39
4.2.2	Perturbed motion .....	47
4.2.3	Disturbing accelerations .....	50
4.3	Orbit determination .....	54
4.3.1	Keplerian orbit .....	55
4.3.2	Perturbed orbit .....	58
4.4	Orbit dissemination .....	63
4.4.1	Tracking networks .....	63
4.4.2	Ephemerides .....	65
<b>5</b>	<b>Satellite signal</b>	<b>71</b>
5.1	Signal structure .....	71
5.1.1	Physical fundamentals .....	71
5.1.2	Components of the signal .....	73
5.2	Signal processing .....	77
5.2.1	Receiver design .....	78
5.2.2	Processing techniques .....	81
<b>6</b>	<b>Observables</b>	<b>87</b>
6.1	Data acquisition .....	87
6.1.1	Code pseudoranges .....	87
6.1.2	Phase pseudoranges .....	88
6.1.3	Doppler data .....	90
6.1.4	Biases and noise .....	91
6.2	Data combinations .....	92
6.2.1	Linear phase combinations .....	93
6.2.2	Code pseudorange smoothing .....	94
6.3	Atmospheric effects .....	97
6.3.1	Phase and group velocity .....	97
6.3.2	Ionospheric refraction .....	99
6.3.3	Tropospheric refraction .....	106
6.3.4	Atmospheric monitoring .....	116
6.4	Relativistic effects .....	118
6.4.1	Special relativity .....	118
6.4.2	General relativity .....	122
6.4.3	Relevant relativistic effects for GPS .....	122
6.5	Antenna phase center offset and variation .....	124

6.6	Multipath .....	125
6.6.1	General remarks .....	125
6.6.2	Mathematical model .....	127
6.6.3	Multipath reduction .....	129
<b>7</b>	<b>Surveying with GPS</b> .....	<b>133</b>
7.1	Introduction .....	133
7.1.1	Terminology definitions .....	133
7.1.2	Observation techniques .....	135
7.1.3	Field equipment .....	144
7.2	Planning a GPS survey .....	146
7.2.1	General remarks .....	146
7.2.2	Presurvey planning .....	147
7.2.3	Field reconnaissance .....	155
7.2.4	Monumentation .....	157
7.2.5	Organizational design .....	157
7.3	Surveying procedure .....	162
7.3.1	Preobservation .....	162
7.3.2	Observation .....	165
7.3.3	Postobservation .....	166
7.3.4	Ties to control monuments .....	167
7.4	In situ data processing .....	168
7.4.1	Data transfer .....	168
7.4.2	Data processing .....	169
7.4.3	Trouble shooting and quality control .....	171
7.4.4	Datum transformations .....	175
7.4.5	Computation of plane coordinates .....	178
7.5	Survey report .....	179
<b>8</b>	<b>Mathematical models for positioning</b> .....	<b>181</b>
8.1	Point positioning .....	181
8.1.1	Point positioning with code ranges .....	181
8.1.2	Point positioning with carrier phases .....	183
8.1.3	Point positioning with Doppler data .....	185
8.2	Differential positioning .....	186
8.2.1	Basic concept .....	186
8.2.2	DGPS with code ranges .....	186
8.2.3	DGPS with phase ranges .....	188
8.3	Relative positioning .....	189
8.3.1	Phase differences .....	190
8.3.2	Correlations of the phase combinations .....	192
8.3.3	Static relative positioning .....	198

8.3.4 Kinematic relative positioning .....	200
8.3.5 Pseudokinematic relative positioning .....	202
<b>9 Data processing</b> .....	<b>203</b>
9.1 Data preprocessing .....	203
9.1.1 Data handling .....	203
9.1.2 Cycle slip detection and repair .....	205
9.2 Ambiguity resolution .....	213
9.2.1 General aspects .....	213
9.2.2 Basic approaches .....	216
9.2.3 Search techniques .....	223
9.2.4 Ambiguity validation .....	247
9.3 Adjustment, filtering, and smoothing .....	248
9.3.1 Least squares adjustment .....	248
9.3.2 Kalman filtering .....	252
9.3.3 Smoothing .....	255
9.4 Adjustment of mathematical GPS models .....	256
9.4.1 Linearization .....	256
9.4.2 Linear model for point positioning with code ranges ...	257
9.4.3 Linear model for point positioning with carrier phases	260
9.4.4 Linear model for relative positioning .....	262
9.5 Network adjustment .....	264
9.5.1 Single baseline solution .....	264
9.5.2 Multipoint solution .....	265
9.5.3 Single baseline versus multipoint solution .....	268
9.5.4 Least squares adjustment of baselines .....	269
9.6 Dilution of precision .....	271
9.7 Accuracy measures .....	275
9.7.1 Introduction .....	275
9.7.2 Chi-square distribution .....	276
9.7.3 Specifications .....	276
<b>10 Transformation of GPS results</b> .....	<b>279</b>
10.1 Introduction .....	279
10.2 Coordinate transformations .....	279
10.2.1 Cartesian coordinates and ellipsoidal coordinates ....	279
10.2.2 Global coordinates and local level coordinates .....	282
10.2.3 Ellipsoidal coordinates and plane coordinates .....	285
10.2.4 Height transformation .....	290
10.3 Datum transformations .....	292
10.3.1 Three-dimensional transformation .....	293
10.3.2 Two-dimensional transformation .....	297
10.3.3 One-dimensional transformation .....	300

10.4	Combining GPS and terrestrial data .....	302
10.4.1	Common coordinate system .....	302
10.4.2	Representation of measurement quantities .....	303
<b>11</b>	<b>Software modules</b> .....	<b>309</b>
11.1	Introduction .....	309
11.2	Planning .....	309
11.3	Data transfer .....	310
11.4	Data processing .....	311
11.5	Quality control .....	313
11.6	Network computations .....	314
11.7	Data base management .....	315
11.8	Utilities .....	316
11.9	Flexibility .....	317
<b>12</b>	<b>Applications of GPS</b> .....	<b>319</b>
12.1	General uses of GPS .....	319
12.1.1	Global uses .....	320
12.1.2	Regional uses .....	322
12.1.3	Local uses .....	324
12.2	Attitude determination .....	326
12.2.1	Theoretical considerations .....	326
12.2.2	Practical considerations .....	330
12.3	Airborne GPS for photo-control .....	330
12.4	Interoperability of GPS .....	333
12.4.1	GPS and Inertial Navigation Systems .....	333
12.4.2	GPS and GLONASS .....	334
12.4.3	GPS and other sensors .....	338
12.4.4	GPS and the Federal Radionavigation Plan .....	338
12.5	Installation of control networks .....	339
12.5.1	Passive control networks .....	339
12.5.2	Active control networks .....	341
<b>13</b>	<b>Future of GPS</b> .....	<b>345</b>
13.1	New application aspects .....	345
13.2	GPS modernization .....	346
13.2.1	Future GPS satellites .....	346
13.2.2	Augmented signal structure .....	346
13.3	GPS augmentation .....	347
13.3.1	Ground-based augmentation .....	348
13.3.2	Satellite-based augmentation .....	348

13.4 GNSS ..... 348

    13.4.1 GNSS development ..... 348

    13.4.2 GNSS/Loran-C integration ..... 349

13.5 Hardware and software improvements ..... 350

    13.5.1 Hardware ..... 350

    13.5.2 Software ..... 352

13.6 Conclusion ..... 352
