# Contents

<b>Preface</b>	<b>xiii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 What are image processing and computer vision?	1
1.2 Historical overview	1
1.3 Sample applications	2
1.3.1 Optical character recognition	2
1.3.2 Biometry	5
1.3.3 Aerial photography	6
1.4 Routemap to the book	7
1.5 Bibliography	9
1.6 Exercises	10
<b>2 Image representation</b>	<b>11</b>
2.1 Introduction	11
2.2 The human visual system	12
2.3 Image capture	16
2.4 Image quality measurements	18
2.4.1 Sources of degradation	18
2.4.2 Signal to noise ratio	21
2.5 Image resolution	24
2.5.1 Spatial resolution	24
2.5.2 Brightness and colour resolution	26
2.5.3 Temporal resolution	29
2.5.4 Interactions	29
2.6 Connectivity and distance	29
2.7 Colour representation models	34
2.8 Camera calibration	37
2.9 Summary	39
2.10 Bibliography	40
2.11 Exercises	40
<b>3 Image transforms and feature extraction</b>	<b>41</b>
3.1 A classification of image transforms	41

3.2	Point transforms	43
3.2.1	Grey scale manipulation	43
3.2.2	Thresholding	47
3.2.3	Histogram manipulation	48
3.3	Local transforms	51
3.3.1	Convolution	51
3.3.2	Smoothing	54
3.3.3	Sharpening and edge enhancement	59
3.3.4	Corner detection	68
3.4	Global transforms	71
3.4.1	Fourier transform	71
3.4.2	Wavelet transform	73
3.4.3	Hough transform	77
3.4.4	Principal component transform	79
3.5	Processing in the frequency domain	81
3.5.1	Convolution theorem	81
3.5.2	Smoothing	82
3.5.3	Sharpening	82
3.6	Geometrical transformations	84
3.6.1	Linear transformations	86
3.6.2	Non-linear transformations	87
3.6.3	Image resampling	89
3.7	Summary	90
3.8	Bibliography	90
3.9	Exercises	90
<b>4</b>	<b>Morphology</b>	<b>92</b>
4.1	Thresholding	92
4.1.1	Thresholding monochrome images	92
4.1.2	Thresholding colour images	98
4.1.3	Outcome of thresholding operations	99
4.2	Processing binary images	99
4.2.1	Erosion	101
4.2.2	Dilation	103
4.2.3	Opening	104
4.2.4	Closing	105
4.3	Processing grey scale images	107
4.3.1	Erosion and dilation	107
4.3.2	Opening and closing	108
4.3.3	Applications	110
4.4	Structural features	113
4.4.1	Distance transform	113
4.4.2	Skeleton	114
4.4.3	Convex hull	116

4.5	Summary	118
4.6	Bibliography	118
4.7	Exercises	118
<b>5</b>	<b>Region detection</b>	<b>120</b>
5.1	Introduction	120
5.2	Point based methods – thresholding	123
5.2.1	Global thresholds	123
5.2.2	Local thresholds	125
5.3	Local methods – region growing	126
5.3.1	Region accumulation	126
5.3.2	Split and merge	129
5.4	Local methods – edge detection and following	132
5.4.1	Edge detection	132
5.4.2	Edge description	135
5.5	Scale-based methods	136
5.5.1	Why scale?	136
5.5.2	Pyramids	138
5.5.3	Feature extraction	141
5.5.4	Wavelets	144
5.6	Watersheds	146
5.6.1	Definitions	147
5.6.2	Practice	148
5.7	Representing regions	149
5.7.1	Region map	149
5.7.2	Edge description	149
5.7.3	Hierarchical representations	149
5.8	Summary	150
5.9	Bibliography	150
5.10	Exercises	150
<b>6</b>	<b>Region description</b>	<b>151</b>
6.1	Introduction	151
6.2	Features derived from binary images	152
6.2.1	Connected component analysis	152
6.2.2	Area and perimeter	154
6.3	Outline description	155
6.3.1	Chain codes	156
6.3.2	Linear segments	160
6.3.3	Spline curves	161
6.3.4	Fourier descriptors	161
6.3.5	Phi-s codes	163
6.3.6	Snakes or dynamic contours	165
6.3.7	Boundary segments	167

6.4	Texture	168
6.4.1	Statistical texture measurements	169
6.4.2	Structural texture measurements	171
6.5	Shape from X	173
6.5.1	Motion	174
6.5.2	Stereo	174
6.5.3	Illumination	177
6.5.4	Shading	178
6.5.5	Texture	178
6.6	Summary	179
6.7	Bibliography	179
6.8	Exercises	179
<b>7</b>	<b>Region labelling</b>	<b>181</b>
7.1	Introduction	181
7.2	Object labelling	183
7.2.1	Template matching	183
7.2.2	Flexible templates	186
7.3	Active shape models	187
7.3.1	Principal component shapes	189
7.3.2	Principal component images	189
7.4	Statistical recognition	190
7.4.1	Discriminant analysis	192
7.4.2	Bayesian classification	194
7.5	Syntactic recognition	197
7.6	Evaluation	198
7.6.1	Classification rate	199
7.6.2	Confusion matrix	201
7.7	Summary	201
7.8	Bibliography	201
7.9	Exercises	202
<b>8</b>	<b>System architecture</b>	<b>203</b>
8.1	Introduction	203
8.2	Knowledge representation	204
8.2.1	Implied	205
8.2.2	Feature vectors	205
8.2.3	Relational structures	206
8.2.4	Hierarchical structures	207
8.2.5	Rules	208
8.2.6	Frames	211
8.3	Hierarchical control	213
8.3.1	Top-down control	213
8.3.2	Bottom-up control	214

8.3.3	Critique	214
8.3.4	Hybrid control	215
8.4	Heterarchical control	215
8.5	Information integration	216
8.6	Summary	218
8.7	Bibliography	219
8.8	Exercises	219
<b>9</b>	<b>Motion tracking</b>	<b>221</b>
9.1	Introduction	221
9.2	Camera calibration revisited	222
9.2.1	Theory	222
9.2.2	Practice	225
9.3	Target acquisition	226
9.3.1	Image differencing	226
9.3.2	Background images	232
9.4	Target following	234
9.4.1	Matching	235
9.4.2	Minimum path curvature	237
9.4.3	Model-based tracking	238
9.4.4	Condensation tracking	242
9.4.5	Hidden Markov models	245
9.5	Optic flow	248
9.6	Summary	250
9.7	Bibliography	251
9.8	Exercises	252
<b>10</b>	<b>Image and video coding</b>	<b>253</b>
10.1	Why is coding necessary?	253
10.2	General principles underlying coding algorithms	254
10.2.1	Spatial redundancy	255
10.2.2	Chromatic redundancy	255
10.2.3	Temporal redundancy	256
10.2.4	Perceptual redundancy	257
10.2.5	Lossless and lossy coding methods	258
10.2.6	Assessment of coding methods	259
10.3	Lossless image coding methods	261
10.3.1	Difference coding	262
10.3.2	Predictive coding	263
10.3.3	Runlength coding	264
10.3.4	Huffman coding	265
10.3.5	GIF	266
10.4	Lossy image coding methods	266
10.4.1	Wavelet coders	267

10.4.2	JPEG standards	269
10.5	Video coding	273
10.5.1	MPEG standards	273
10.5.2	Other video coding standards	275
10.6	Summary	275
10.7	Bibliography	275
10.8	Exercises	276
<b>11</b>	<b>Conclusions</b>	<b>277</b>
<b>Appendices</b>		
<b>A</b>	<b>The Fourier transform</b>	<b>279</b>
A.1	Properties of the 2D Fourier transform	279
A.2	Fourier transform pairs	282
<b>B</b>	<b>The wavelet transform</b>	<b>285</b>
<b>C</b>	<b>Linear mathematics</b>	<b>287</b>
C.1	Matrices and vectors	287
C.2	Statistics	289
C.2.1	Measures of central tendency and spread	289
C.2.2	Least squares minimisation	289
