# Analytical Methods in Wood Chemistry, Pulping, and Papermaking

Springer

# Contents

|          |  |           |
|----------|--|-----------|
| <b>1</b> | <b>Chemical Composition of Wood and Pulps: Basic Constituents and Their Distribution</b> .....         | <b>1</b>  |
|          | E. SJÖSTRÖM and U. WESTERMARK  |           |
| 1.1      | Introduction .....   | 1         |
| 1.2      | Gross Composition of Wood .....  | 2         |
| 1.2.1    | Polysaccharides .....  | 3         |
| 1.2.2    | Lignin .....   | 8         |
| 1.2.3    | Extractives and Inorganic Components .....   | 10        |
| 1.2.4    | Basic Differences Between Softwoods and Hardwoods .....  | 10        |
| 1.3      | Distribution of Wood Constituents .....  | 11        |
| 1.3.1    | Differences Between the Macroscopic Wood Parts and Fiber Types .....                                   | 12        |
| 1.3.2    | Composition of Cell Walls .....  | 12        |
| 1.4      | Composition of Pulps .....   | 15        |
| 1.4.1    | Chemical Pulps .....   | 15        |
| 1.4.2    | Mechanical and Chemimechanical Pulps .....   | 18        |
|          | References .....   | 19        |
| <br>     |  |           |
| <b>2</b> | <b>Separation and Analysis of Wood Constituents with Respect to Their Morphological Location</b> ..... | <b>21</b> |
|          | U. WESTERMARK and E. SJÖSTRÖM  |           |
| 2.1      | Introduction .....   | 21        |
| 2.2      | Separation of Macroscopic Wood Parts .....   | 21        |
| 2.2.1    | Normal Wood .....  | 21        |
| 2.2.2    | Compression Wood .....   | 22        |
| 2.2.3    | Tension Wood .....   | 23        |
| 2.3      | Separation of Wood and Pulp Tissues .....  | 23        |
| 2.3.1    | Isolation of Fines from Pulps .....  | 23        |
| 2.3.2    | Isolation of Ray Cells from Wood and Pulps .....   | 25        |
| 2.3.3    | Isolation of Vessels from Wood and Pulps .....   | 25        |
| 2.4      | Analysis of Cell Wall Layers and Middle Lamella .....  | 26        |
| 2.4.1    | Direct Determination of Lignin .....   | 27        |
| 2.4.2    | Wood Material for Separation Studies .....   | 28        |
| 2.4.3    | Density Gradient Separation of Middle Lamella and Secondary Wall Material .....                        | 29        |

|          |   |   |
|----------|---|---|
| 2.4.4    | Mechanical Separation of Middle Lamella, Primary Wall Material, and Ray Cells | 2 |
| 2.4.5    | Isolation of Middle Lamella from Soft Xylem                                   | 3 |
| 2.4.6    | Isolation of Cell Wall Layers from Differentiating Xylem                      | 3 |
| 2.4.7    | Peeling of Cell Wall Layers from Pulp Fibers                                  | 3 |
|          | References  | 3 |
| <b>3</b> | <b>Carbohydrates</b>  | 3 |
|          | T. VUORINEN and R. ALÉN   |   |
| 3.1      | Introduction  | 3 |
| 3.2      | Isolation and Fractionation of Polysaccharides                                | 3 |
| 3.2.1    | Preparation of Holocellulose  | 3 |
| 3.2.2    | Fractional Extraction of Hemicelluloses and Pectins                           | 4 |
| 3.2.3    | Purification of Hemicelluloses  | 4 |
| 3.3      | Detection of Carbohydrates  | 4 |
| 3.4      | Monosaccharide Composition  | 4 |
| 3.4.1    | Cleavage of Glycosidic Bonds  | 4 |
| 3.4.2    | Determination of Monosaccharides  | 4 |
| 3.5      | Linkage Positions   | 5 |
| 3.5.1    | Permethylation  | 5 |
| 3.5.1.1  | Methylation with Methyl Iodide  | 5 |
| 3.5.1.2  | Methylation with Methyl Trifluoromethanesulfonate                             | 5 |
| 3.5.1.3  | Techniques for <i>O</i> -Acylated Polysaccharides                             | 5 |
| 3.5.2    | Cleavage of Glycosidic Bonds  | 5 |
| 3.5.3    | Separation of Monomers by GC  | 5 |
| 3.5.4    | Structure of Monomers by GC/MS  | 5 |
| 3.6      | Linkage Sequence  | 6 |
| 3.6.1    | Partial Hydrolysis  | 6 |
| 3.6.1.1  | Chemical Hydrolysis   | 6 |
| 3.6.1.2  | Enzymic Hydrolysis  | 6 |
| 3.6.2    | Fractionation of Oligosaccharides   | 6 |
| 3.6.3    | Structure of Oligosaccharides   | 6 |
| 3.6.3.1  | Fast Atom Bombardment Mass Spectroscopy                                       | 6 |
| 3.6.3.2  | Nuclear Magnetic Resonance Spectroscopy                                       | 6 |
| 3.7      | Anomeric Configuration and Ring Size  | 6 |
| 3.8      | Molecular Weight  | 7 |
| 3.8.1    | Gel Permeation Chromatography   | 7 |
| 3.8.2    | End Group Analysis  | 7 |
|          | References  | 7 |
| <b>4</b> | <b>Lignin</b>   | 7 |
|          | G. BRUNOW, K. LUNDQUIST, and G. GELLERSTEDT                                   |   |
| 4.1      | Definition  | 7 |
| 4.2      | Structure, Nomenclature   | 8 |

|          |  |            |
|----------|--|------------|
| 4.2.1    | Protolignin .....  | 80         |
| 4.2.2    | Forms of Lignins after Pulping and Bleaching .....                           | 80         |
| 4.3      | Detection and Classification .....   | 85         |
| 4.3.1    | Detection of Lignin .....  | 85         |
| 4.3.2    | Classification of Lignins .....  | 88         |
| 4.4      | Quantitative Analysis .....  | 90         |
| 4.4.1    | Wood and Pulps .....   | 90         |
| 4.4.2    | Aqueous Solution .....   | 92         |
| 4.5      | Isolation of Lignin .....  | 92         |
| 4.5.1    | Wood .....   | 92         |
| 4.5.2    | Pulps .....  | 94         |
| 4.5.3    | Pulping Liquors .....  | 97         |
| 4.6      | Structural Analysis of Lignin .....  | 98         |
| 4.6.1    | Methods Based on Degradation .....   | 88         |
| 4.6.2    | Spectroscopic Methods .....  | 108        |
| 4.7      | Analysis of Functional Groups in Lignin .....                                | 113        |
| 4.8      | Lignin Model Compounds .....   | 116        |
| 4.9      | Determination of Macromolecular Properties of Lignin .....                   | 117        |
|          | References .....   | 120        |
| <b>5</b> | <b>Extractives .....</b>   | <b>125</b> |
|          | B. HOLMBOM   |            |
| 5.1      | Introduction .....   | 125        |
| 5.2      | Sampling and Sample Pretreatment .....                                       | 127        |
| 5.3      | Extraction .....   | 129        |
| 5.3.1    | Solvents .....   | 129        |
| 5.3.2    | Extraction Techniques .....  | 130        |
| 5.3.3    | Solvent Evaporation and Drying of Extracts .....                             | 132        |
| 5.4      | Analysis of Extracts .....   | 132        |
| 5.4.1    | Determination of Component Groups .....                                      | 133        |
| 5.4.2    | Analysis of Individual Components by GC .....                                | 140        |
| 5.5      | In-Situ Analysis of Extractives and Spots in Pulp<br>and Paper Samples ..... | 145        |
| 5.6      | Summary and Concluding Remarks .....   | 145        |
|          | References .....   | 146        |
| <b>6</b> | <b>Direct Characterization of Chemical Properties of Fibers .....</b>        | <b>149</b> |
|          | P. STENIUS and T. VUORINEN   |            |
| 6.1      | Introduction .....   | 149        |
| 6.2      | Spectroscopic Determination of Bulk Composition .....                        | 149        |
| 6.2.1    | CP/MAS <sup>13</sup> C NMR Spectroscopy .....                                | 149        |

|          |  |     |
|----------|--|-----|
| 6.2.2    | FTIR Spectroscopy .....  | 154 |
| 6.2.3    | Raman Spectroscopy .....   | 158 |
| 6.2.4    | UV/Vis Spectroscopy .....  | 160 |
| 6.3      | Spectroscopic Determination of Surface Composition .....                   | 160 |
| 6.3.1    | Electron Spectroscopy for Chemical Analysis (ESCA) .....                   | 161 |
| 6.3.1.1  | Principle of ESCA .....  | 161 |
| 6.3.1.2  | The ESCA Spectrometer .....  | 163 |
| 6.3.1.3  | Escape Depth .....   | 164 |
| 6.3.1.4  | Qualitative Elemental Analysis .....                                       | 164 |
| 6.3.1.5  | Quantitative Analysis .....  | 165 |
| 6.3.1.6  | Chemical Shifts .....  | 165 |
| 6.3.1.7  | Angular Dependent Effects .....  | 168 |
| 6.3.1.8  | Derivatization of Functional Groups .....                                  | 169 |
| 6.3.1.9  | Effects of Charging .....  | 169 |
| 6.3.1.10 | Valence Band Spectroscopy .....  | 171 |
| 6.3.2    | Secondary Ion Mass Spectroscopy (SIMS) .....                               | 171 |
| 6.3.2.1  | Principle of SIMS .....  | 171 |
| 6.3.2.2  | Instrumentation .....  | 173 |
| 6.3.2.3  | The Sputtering and Ionization Processes .....                              | 173 |
| 6.3.2.4  | Applications .....   | 174 |
| 6.4      | Surface Analysis by Enzyme Treatment .....                                 | 174 |
| 6.5      | Determination of Functional Groups by Specific Chemical<br>Reactions ..... | 177 |
| 6.6      | Determination of Ionizable Groups (Fiber Charge) .....                     | 178 |
| 6.6.1    | Ion Exchange .....   | 179 |
| 6.6.2    | Conductometric Titration .....   | 180 |
| 6.6.3    | Potentiometric Titration .....   | 182 |
| 6.6.4    | Polyelectrolyte Adsorption .....   | 185 |
| 6.7      | Pyrolysis Gas Chromatography .....   | 186 |

## 7 Characterization of Pulping Liquors .....

K. NIEMELÄ and R. ALÉN

|         |  |     |
|---------|--|-----|
| 7.1     | Introduction .....                                   | 193 |
| 7.2     | Kraft Black Liquors .....                            | 195 |
| 7.2.1   | Polysaccharides and Their Degradation Products ..... | 195 |
| 7.2.1.1 | Polysaccharides .....                                | 196 |
| 7.2.1.2 | Types of Degradation Products .....                  | 196 |
| 7.2.1.3 | Volatile Fatty Acids .....                           | 197 |
| 7.2.1.4 | Hydroxy Carboxylic Acids .....                       | 198 |
| 7.2.1.5 | Other Aliphatic Carboxylic Acids .....               | 203 |

|          |   |            |
|----------|---|------------|
| 7.2.1.6  | Other Degradation Products .....  | 205        |
| 7.2.2    | Lignin and Its Degradation Products .....   | 205        |
| 7.2.2.1  | Kraft Lignin .....  | 205        |
| 7.2.2.2  | Degradation Products of Lignin .....  | 206        |
| 7.2.3    | Extractives and Their Transformation Products .....   | 213        |
| 7.2.3.1  | Fatty and Resin Acids and Terpenoids .....  | 213        |
| 7.2.3.2  | Other Compounds .....   | 213        |
| 7.2.4    | Miscellaneous Compounds .....   | 214        |
| 7.2.4.1  | Protein-Derived Compounds .....   | 214        |
| 7.2.4.2  | Suberin-Derived Compounds .....   | 215        |
| 7.2.4.3  | Other Compounds .....   | 215        |
| 7.3      | Sulfite Spent Liquors .....   | 217        |
| 7.3.1    | Degradation Products of Polysaccharides .....   | 218        |
| 7.3.2    | Lignosulfonates and Their Degradation Products .....  | 218        |
| 7.3.3    | Extractives .....   | 219        |
| 7.4      | Inorganic Components .....  | 220        |
| 7.4.1    | Kraft Black Liquors .....   | 221        |
| 7.4.2    | Sulfite Spent Liquors .....   | 222        |
| 7.5      | Physical Properties .....   | 224        |
| 7.5.1    | Dry Solids Content .....  | 224        |
| 7.5.2    | Density .....   | 225        |
| 7.5.3    | Viscosity .....   | 225        |
| 7.5.4    | Heating Value .....   | 226        |
| 7.5.5    | Other Physical Parameters .....   | 226        |
|          | References .....  | 226        |
| <b>8</b> | <b>Analysis of Bleach Liquors .....</b>   | <b>233</b> |
|          | O. DAHLMAN, R. MÖRCK, and J. KNUUTINEN  |            |
| 8.1      | Introduction .....  | 233        |
| 8.2      | Methods for Determination of Sum Parameters .....   | 233        |
| 8.2.1    | Adsorbable Organic Halogens (AOX) .....   | 233        |
| 8.2.2    | Extractable Organic Halogens (EOX) .....  | 235        |
| 8.2.3    | Chemical Oxygen Demand (COD),<br>Total Organic Carbon (TOC),<br>and Biochemical Oxygen Demand (BOD) ..... | 235        |
| 8.3      | Molecular Weight Distribution .....   | 237        |
| 8.4      | Characterization of Low-Molecular Weight Compounds .....  | 238        |
