

PRACTICAL

# INDUCTION HEAT TREATING

Richard E. Haimbaugh

The Materials  
Information Society

# Contents

CHAPTER 1: Heat Treating of Metal	1
CHAPTER 2: Theory of Heating by Induction	5
CHAPTER 3: Induction Heat Treating Systems	19
CHAPTER 4: Induction Coils	43
CHAPTER 5: Heat Treating Basics	75
CHAPTER 6: Quenching	121
CHAPTER 7: Tempering	137
CHAPTER 8: Cleaning and Rust Protection	149
CHAPTER 9: Decarburization and Defects	151
CHAPTER 10: Applications of Induction Heat Treatment	165
CHAPTER 11: Induction Heat Treating Process Analysis	183
CHAPTER 12: Standards and Inspection	215
CHAPTER 13: Nonconforming Product and Process Problems	235
CHAPTER 14: Quality Control	249
CHAPTER 15: Maintenance	261
APPENDIX 1: Metallurgical Definitions for Induction Heat Treating	267
APPENDIX 2: Scan Hardening	279
APPENDIX 3: Induction Coil Design and Fabrication	283
APPENDIX 4: Quench System Design	299
APPENDIX 5: Induction Tempering	307
APPENDIX 6: Tempering Curves	311
APPENDIX 7: Hardenability Curves	315
