

H. Hellendoorn
D. Driankov (Eds.)

Fuzzy Model Identification

Selected Approaches

Springer

Table of Contents

Preface	V
List of Contributors	XI
Introduction	XIII

General Overview

Fuzzy Identification from a Grey Box Modeling Point of View P. Lindskog	3
1. Introduction	3
2. System Identification	5
3. Fuzzy Modeling Framework	15
4. Fuzzy Identification Based on Prior Knowledge	25
5. Example – Tank Level Modeling	38
6. Practical Aspects	44
7. Conclusions and Future Work	46
References	47

Clustering Methods

Constructing Fuzzy Models by Product Space Clustering R. Babuška and H.B. Verbruggen	53
1. Introduction	53
2. Overview of Fuzzy Models	55
3. Structure Selection for Modeling of Dynamic Systems	57
4. Fuzzy Clustering	61
5. Deriving Takagi–Sugeno Fuzzy Models	68
6. Example: pH Neutralization	79
7. Practical Considerations and Concluding Remarks	83
A. The Gustafson–Kessel Algorithm – MATLAB Implementation	85
References	87

Identification of Takagi-Sugeno Fuzzy Models via Clustering and Hough Transform

M.-K. Park, S.-H. Ji, E.-T. Kim, and M. Park	91
1. Introduction	91
2. The Identification Method	93
3. Example 1	108
4. Example 2	110
5. Summary of the Identification Procedure	115
6. Practical Considerations and Concluding Remarks	116
References	119

Rapid Prototyping of Fuzzy Models Based on Hierarchical Clustering

M. Delgado, M.A. Vila, and A.F. Gomez-Skarmeta	121
1. Introduction	121
2. The Fuzzy C-Means Algorithm	123
3. Using Hierarchical Clustering to Preprocess Data	125
4. Rapid Prototyping of Approximative Fuzzy Models	138
5. Rapid Prototyping of Descriptive Fuzzy Models	144
6. Examples	150
7. Practical Considerations and Concluding Remarks	156
A. Proofs of Propositions	157
References	158

Neural Networks

Fuzzy Identification Using Methods of Intelligent Data Analysis

J. Hollatz	165
1. Introduction	165
2. Neuro-Fuzzy Methods	167
3. Density Estimation	176
4. Fuzzy Clustering	181
5. Conclusion	186
A. From Rules to Networks	187
B. Learning Rule for RBF Networks	188
C. Update Equations for Gaussian Mixtures	189
D. Adaptation Algorithm for Fuzzy Clustering	189
References	191

Identification of Singleton Fuzzy Models via Fuzzy Hyperrectangular Composite NN

M.-C. Su	193
1. Introduction	193
2. Classification of Fuzzy Models	194
3. Fuzzy Neural Networks	201
4. Identification of Singleton Fuzzy Models	204
5. Simulation Results	206
6. Practical Considerations and Concluding Remarks	209
References	211

Genetic Algorithms

Identification of Linguistic Fuzzy Models by Means of Genetic Algorithms

O. Cordón and F. Herrera	215
1. Introduction	215
2. Evolutionary Algorithms and Genetic Fuzzy Systems	216
3. The Fuzzy Model Identification Problem	223
4. The Genetic Fuzzy Identification Method	228
5. Example	242
6. Practical Considerations and Concluding Remarks	247
References	248

Optimization of Fuzzy Models by Global Numeric Optimization

V. Vergara and C. Moraga	251
1. Introduction	251
2. Theoretical Aspects of Fuzzy Models	251
3. The Fuzzy Identification Method	260
4. Simulation Results	267
5. Practical Aspects	275
References	277

Artificial Intelligence

Identification of Linguistic Fuzzy Models Based on Learning	
Y. Nakoula, S. Galichet, and L. Foulloy	281
1. Introduction	281
2. Basic Concepts and Notation	282
3. The Identification Problem	284
4. The Fuzzy Identification Method	295
5. Numeric Examples	307
6. Practical Aspects and Concluding Remarks	314
References	317
