Contents

Contributors	vii
Foreword by Senator Edmund S. Muskie	ix
Preface	xi

Section 1. Evolution of Industrial Pollution Control

1. The Industrial Pollution Problem	1-3
Legislative History	1-5
But the Fates Intervene	1-8
Criteria and Standards	1-9
Assimilative Capacity and Economics	1-11
Tax Relief	1-13
Research	1-14
Analytical Considerations	1-16
Administrative Mechanics	1-18
2. History of Federal Pollution Control Legislation	2-1
Water Pollution Control Legislation	2-2
The Water Quality Act of 1965	2-6; Clean Water Restoration Act of 1969 2-8
A Summing Up	2-9
Air Pollution Control	2-22
Pioneering in Air Pollution	2-23
History of the Air Quality Act of 1967	2-27
Conclusion	2-32
Appendix	2-32
Sources and Control of Emissions	2-32; Prior Legislation for Air Pollution Control 2-32; Sewage Treatment Needs 2-37

3. History of State and Local Pollution Laws	3-1
Introduction	3-1
Ancient History	3-1; Medieval History 3-2; The Victorian Age 3-2; The Modern Age 3-2; Early Local Regulations 3-3
Water Pollution Control	3-4
Current Ordinances	3-4; What Federal Water Quality Act Means 3-5; Legal Aspects of Water Quality Criteria 3-6; Federal Guidelines on Water Treatment 3-8; Industrial Equivalent of Secondary Treatment 3-8; Interpretation of Legislation 3-9
Air Pollution Control	3-9
Early Local Legislation	3-10; The New Jersey Control Act 3-10; The New York State Control Act 3-10; Evolution of Los Angeles Air Pollution Control Program 3-10; San Francisco Bay Area Regulations 3-11; Trend toward Ambient Air Quality Regulations 3-12; South Carolina's Stack Emissions Control 3-13; Texas and Compliance for Existing Facilities 3-13; New York State's Ambient Air and Emissions Control 3-13; Effect of Enforcement Inequity on Competitive Status 3-14; Priorities for Control 3-14; The Local Community Function 3-15; Impact of Federal Act on State and Local Control 3-15; Educating Industrial Management 3-16; Predictions on Future Regulation 3-16; Concern over Total Environmental Control 3-16
4. Air and Water Pollution Quality Standards	4-1
part 1: Air Pollution Quality Standards	4-1
Introduction	4-1
Air Quality Standards	4-2
Emission Standards	4-6
Stack Height Standards	4-22
Fuel Standards	4-22
part 2: Water Quality Criteria and Standards for Industrial Effluents	4-23
Physical Pollutants	4-24
Chemical Pollutants	4-28
Organic Chemicals	4-35
Biochemical Oxygen Demand	4-37
International Water Quality Criteria and Standards	4-38
5. Air Pollution Control Programs and Systems	5-1
Pollution Control by Process Change	5-5
Pollution Control by Removal	5-7
Particulates	5-7
Removal of Gaseous and Odorous Pollutants	5-20
Adsorption	5-20; Adsorption Equipment 5-21; Absorption 5-23; Combustion 5-27; Masking and Counteraction of Odors 5-32; Dispersion 5-33; Determination of Requirements 5-36
6. Water Pollution Control Programs and Systems	6-1
Elements of a Pollution Control Program	6-3
Flow Measurement	6-3; Waste Water and Stream Sampling 6-7; Handling of Samples 6-8; Reporting of Analytical Results 6-10; Waste Load Calculations 6-10

lations 6-10; Analysis of Data 6-10; Reducing Waste Load by In-plant Changes 6-11; Segregation of Waste Streams 6-11; Desalination Techniques 6-26
 Summary 6-27

7. Pollution Waste Control 7-1

Introduction 7-1
 Air Pollution 7-1; Water Pollution 7-2; Land Pollution 7-2; Interpollution of Resources 7-2
 Disposal of Gaseous Wastes 7-3
 Waste Gas Incineration 7-4; Odor Control 7-13; Stacks and Chimneys 7-16; SO₂ and Nitrogen Oxide 7-21
 Disposal of Liquid Wastes 7-22
 Incineration 7-23; Partially Combustible Waste 7-25; Other Oxidation Methods 7-28; Deep-well Disposal 7-31; Lagoons and Ponds 7-35; Liquid Waste Dispersion 7-36; Land Disposal 7-37
 Solid Waste Disposal 7-37
 Pretreatment 7-38; Solids Incineration 7-38; Heat Recovery from Solid Waste Incinerators 7-42; Composting 7-43; Sanitary Landfill 7-44

8. The Coordinated Industrial-Municipal-Regional Approach to Air and Water Pollution Control 8-1

Introduction 8-1
 Water Pollution 8-1; Air Pollution 8-3
 The Joint Approach in Water Pollution Control 8-3
 Conventional Cases 8-4; Unique Cases 8-8; Sewer Use Ordinance 8-11; Plant Preparation for Joint Approach 8-13; Financing the Operation 8-16
 Regional Air Pollution Control 8-24
 Impact of Federal Program 8-24; Interstate Programs 8-25; State Programs 8-27; Regional Developments 8-27

9. Research Programs for Air and Water Pollution Control 9-1

Causes of Air Pollution 9-2
 Nature of Air Pollution 9-2
 Legislation 9-2
 Problem Areas 9-3
 Meteorology 9-3
 Research and Development Activities 9-4
 Composition and Classification of Air Pollutants 9-5
 Problem Evaluations 9-5
 Control of Air Pollution 9-6
 Removal of Chlorine from a Gas Stream 9-7; Removal of Particulates 9-8
 Monitoring 9-8
 Particulate Pollutant Monitoring 9-9; Gaseous Pollutants Monitoring 9-9
 Vehicle Emission Control by a Catalytic Method 9-10
 Equipment and Source of Exhaust Gas 9-10; Analytical Equipment 9-10; Screening Tests 9-10
 Sulfur Dioxide 9-11
 Problem Areas in Water Pollution 9-12
 Sources of Industrial Water Pollution 9-14
 Mining Wastes 9-14; Chemical Pollutants 9-14; Treatment and Disposal of Industrial Waste Waters 9-16

Research Development 9-17
 Waste Evaluation 9-18
 Treatment of Wastes 9-18
 Present Interest in Waste Treatment 9-18; Disposal of Waste Effluents 9-18
 Water Quality Surveillance 9-19
 Water Treatment 9-19
 Instrumentation 9-19

Section 2. Pollution Control by Industry Problem

10. Pollution Control in the Steel Industry 10-1
 Introduction 10-3
 Water Requirements and Typical Contaminants 10-3
 Air Requirements and Contaminants 10-6
 Solids Handling 10-6
 Waste Water 10-7
 Blast Furnaces 10-7; Casting Operations 10-9; Foundry 10-9; Open
 Hearth Furnaces 10-9; Basic Oxygen Furnaces 10-10; Electric Furnaces
 10-11; Rolling Mills 10-11; Sinter Plant 10-13; Heat Treatment 10-13;
 Acid Pickling 10-15; Vacuum Degassing 10-16; Coke Plant 10-16; Slag
 Plant 10-17; Utilities 10-17; Maintenance Shops 10-18
 Air Pollution 10-19
 Gas Cleaning 10-19; Air Cleaning 10-20

11. Pollution Control in Foundry Operations 11-1
 Introduction—Air Pollution Problems 11-1
 Control of In-plant Air Pollution 11-1
 Selection Criteria Peculiar to Foundries 11-4
 Types of Collectors 11-4; Dust Collector Size 11-5; Working Principles
 11-5; Collected Solids Handling 11-7; Application Limitations 11-7; Initial
 Cost 11-9; Operating Costs 11-9; Character and Sources of Contaminants
 11-10; Airstream Conditions 11-10; Available Space 11-12; Applicable
 Codes 11-13
 Pollution Control of Foundry Operations 11-13
 Melting Department 11-14; Pouring and Mold Cooling Department 11-18;
 Molding Department 11-18; Casting Cleaning Department 11-19; Grinding
 11-19; Abrasive Blasting 11-19; Core Room 11-20; Pattern Shop 11-20;
 Maintenance Shop 11-20
 Water Pollution Problems 11-20
 General Considerations 11-21; Waste Water Treatment Criteria 11-21;
 Funding 11-22; Foundry Site Selection 11-23; Design of Waste Water
 Treatment Systems 11-23; Lagoons 11-24; Clarification and Filtration
 11-24; Package Treatment Systems 11-25; Waste Water Piping Systems
 11-25; Summary 11-27

12. Pollution Control in Plating Operations 12-1
 Water Pollution Problems 12-1
 Sources of Waste 12-2; Toxic, Potentially Harmful, and Corrosive Chemical
 Compounds Commonly Used in the Plating Industry 12-5; Treatment Quali-
 ty Requirements 12-6; Neutralization 12-7; Treatment Methods Commonly
 Used 12-8; Waste Abatement Practices 12-11; Organic Wastes in the Plat-
 ing Room Effluent 12-12; Separation of the Suspended Solids from the

Treated Effluent 12-13; Sludge Handling and Drying 12-13; Solid Waste Discharge 12-13; Water Conservation and Water Reuse 12-14
 Air Pollution Problems 12-15
 Toxic Fumes in the Exhausted Air Discharge 12-15; Equipment Usually Utilized 12-15

13. Pollution Control in Metal Fabricating Plants 13-1

The Metal Fabricating Plant 13-1
 General Considerations and Objectives 13-2
 Threshold Limit Values 13-3
 Ventilation and Pollution Control 13-3
 Machining 13-4
 Surface Finishing 13-4
 Heat Treating 13-7
 Metal Joining Processes 13-8
 Fume Control Measures 13-8
 Metal Finishing Operations 13-10
 Surface Coating 13-10
 Paint Baking 13-13
 Paint Stripping 13-14
 Air Pollution Control Equipment Cost 13-15
 Waste Water Treatment in Metal Fabricating Plants 13-16
 Batch Treatment 13-17; Continuous Treatment 13-18; System Sizing 13-19
 Source Control 13-20
 Plant Layout and the Contamination Control Problem 13-20
 Summary 13-22

14. Pollution Control in the Chemical Industry 14-1

Introduction 14-1
 Air Pollution: General Control Methods 14-2
 Mineral Acids 14-2
 Sulfuric Acid 14-2; Nitric Acid 14-4; Phosphoric Acid 14-6; Hydrochloric Acid 14-8
 Inorganic Gases 14-9
 Sulfur Dioxide 14-9; Hydrogen Sulfide 14-9; Oxides of Nitrogen 14-11; Gaseous Fluorides 14-11; Chlorine 14-12
 Particulate Matter 14-13
 Organic Compounds 14-14
 Solids and Tars 14-14; Liquids 14-14; Gases and Vapors 14-15; Odors 14-16
 Water Pollution 14-19
 Waste Characterization 14-19; Process Changes 14-21; Housekeeping 14-22; Receiving Waters 14-22
 Treatment Methods 14-23
 Physical Treatment 14-24; Chemical Treatment 14-25; Biological Treatment 14-28; Ultimate Disposal Methods 14-30

15. Pollution Control in Textile Mills 15-1

Introduction 15-1
 Processing 15-2

- Cotton 15-2; Wool 15-7; Synthetics 15-10
- Waste Sources, Quantity, and Quality 15-11
 - Cotton 15-11; Wool 15-18
- Overall Character and Residual Waste Treatment 15-18
 - Cotton 15-18; Wool 15-22; Synthetics 15-24
- Water and Chemical Recovery and Reuse 15-26
 - Cotton 15-26; Wool 15-26; Synthetics 15-27
- Waste Surveys and Pilot Investigations 15-27
- Wastewater Treatment with Activated Carbon 15-29
- Air Pollution Control 15-30
- 16. Pollution Control in Food Industries 16-1**
 - Effect of the Environment 16-1
 - Water 16-2
 - Supply Requirements 16-2; Use, Reuse, and Segregation 16-2
 - Source and Characteristics of Waste 16-4
 - Cannery Wastes 16-5; Poultry Wastes 16-9; Meat Packing 16-12; Other Food Wastes 16-15
 - Waste Treatment Methods and Control 16-19
 - In-plant Control 16-19; Screening 16-19; Grease Recovery 16-21; Biological Treatment 16-22; Trickling Filters 16-22; Activated Sludge 16-25; Lagoons 16-26; Spray Irrigation 16-28; Anaerobic Digestion Treatment Process 16-33; Solids Disposal and By-product Recovery 16-34
 - General 16-38
 - Air 16-42
 - Crop Damage from Air Pollution 16-44
- 17. Pollution Control in the Pharmaceutical Industry 17-1**
 - Introduction 17-1
 - Water Pollution 17-2
 - Pharmaceutical Manufacturing 17-2; Waste Treatment 17-6; Chemical Production 17-10; Fermentation Processes 17-14; Radiological Products 17-17; Research Facility 17-17; Miscellaneous 17-17
 - Air Pollution 17-18
 - Pharmaceutical Manufacturing 17-18; Chemical Production 17-21; Fermentation Processes 17-22; Radiological Products 17-23; Research Facilities 17-25; Boiler Plants 17-27; Incinerators 17-30; Materials Reclamation and Regeneration 17-31; Waste Treatment Facilities 17-32
 - Public Relations 17-33
 - Legal Implications 17-34
- 18. Pollution Control in the Pulp and Paper Industry 18-1**
 - Water Pollution 18-1
 - Nature of Pulp and Paper Mill Pollution and Methods of Evaluation of Each 18-3; Types of Pulp and Nature of Pollutants Produced 18-6; Types of Paper and Nature of Pollutants Produced 18-8; Methods of Abating Pollution in the Pulp and Paper Industry 18-8; Progress in Abatement of Water Pollution 18-16
 - Air Pollution 18-17
 - Nature of Pollution 18-17; Effects of Pollution and Abatement Objectives 18-17; Analysis and Monitoring 18-19; Abatement of Odors, Particulates, Other Pollutants 18-19; Conclusions 18-28

19. Pollution Control in the Aerospace and Electronics Industries	19-1
The Industry's Problem	19-1
Community Controls and Codes	19-2
Federal Controls and Codes	19-2
Conflict at the Community Level	19-3
Dust Control	19-4
Safe Working Levels	19-4
Dust Collection Methods	19-6
Smoke and Fumes	19-6
Community Controls and Codes	19-7; Incinerator Controls 19-7
Hydrocarbon Pollution Control	19-8
Definition of Solvent Pollution	19-8
Operations Requiring Control	19-9
Control Methods	19-10; Cleaning and degreasing 19-11; Control by Solvent Substitution 19-12
Industrial Water, Contaminated Wastes, and Control	19-13
Local Codes and Regulations	19-13
Contaminated Water Disposal Methods	19-14
Water Conservation and Reclamation	19-15
Measuring Water Usage	19-15; Total Water Management 19-15; Water Pretreatment and Recirculation 19-16; Water Conservation Applied to Metal Surface Treatment 19-17; Once-through Systems vs. Recirculating Systems 19-19
Limitations Governing Use of Sanitary Sewer Systems	19-19
Radioactive Wastes	19-20
20. European Industrial Pollution Control Practices	20-1
General Comparisons	20-1
Chemical Industry	20-2; Refuse Incineration 20-6; Cement Industry, Holderbank, Switzerland 20-9; Pulp and Paper Industry, Morrum, Sweden 20-10; Metal Industries 20-11; Electrical Manufacturing 20-14; Petroleum Industry 20-16
Sewage Treatment	20-16
Summary	20-18
Section 3. Pollution Control Equipment and Operation	
21. Organizing and Planning a Pollution Control Department	21-1
Organization	21-1
Functions	21-5; Responsibility 21-5; Authority 21-5
Process Evaluation	21-5
Pollutant Source	21-7
Pollution Receptors	21-8
Training	21-10
Control Methodology	21-10
Cost Control	21-12
22. Plant Operation and Training Personnel for Pollution Control	22-1
Operating Abatement Equipment	22-1
Types of Equipment and Specific Training Items	22-2
Bag Dust Collectors	22-2; Cyclones 22-3; Electrostatic Precipitators 22-3;
Wet Scrubbers	22-3; Entrainment Removal 22-4; Settling Ponds 22-5;
Combination Systems	22-6

Economics of Operation 22-6
 Pollution Control Operating Costs 22-7
 Training Personnel 22-9
 General Training Topics 22-12
 Introduction 22-12; Process Theory 22-12; Equipment Familiarization
 22-13; Equipment Operation 22-13; Process Recoveries 22-14; Testing Pro-
 cedures 22-14; Operating Maintenance 22-14; Safety 22-15
 Specific Training Program Outlines 22-15
 Setting Up a Training Manual 22-16
 Training—How to Train Subordinates 22-17
 Training to Operate 22-19
 Conclusions 22-23

23. Air Pollution Control Equipment 23-1

The Nature of Air Pollution 23-1
 Origin of Air Pollutants 23-2
 Information Required Prior to Equipment Design 23-2
 Analyzing Constituents of Polluted Airstreams 23-3; Purpose of Control
 Equipment 23-6
 Specifying Appropriate Types of Collection Equipment 23-7
 Factors Affecting Equipment Specification 23-7
 Cloth Filters 23-9
 Mechanical Collectors 23-16
 Cyclones 23-16; Other Mechanical Collectors 23-20
 Electrostatic Precipitators 23-21
 Wet Scrubbers 23-23
 Venturi Scrubbers 23-26; Other Types of Wet Scrubbers 23-27; Packed
 Towers 23-28
 Steam Plume 23-33
 Regulations 23-37
 Sampling Programs 23-38

24. Water Pollution Control Equipment 24-1

Transportation of Waste Waters 24-2
 Piping Systems 24-2; Pumps 24-2
 Solids Removal 24-3
 Screens 24-3; Grinders 24-6; Grit Removal 24-6; Oil-Water Separation
 24-7; Flocculation 24-7; Clarifiers 24-8; Flotation Units 24-9
 Solids Handling 24-10
 Thickeners 24-10; Anaerobic Digesters 24-10; Aerobic Digestion 24-11;
 Sludge Dewatering 24-11; Sludge Disposal 24-13
 Removal of Dissolved Organics 24-14
 Stabilization Ponds 24-14; Trickling Filters 24-15; The Activated Sludge
 Process 24-17
 Removal of Dissolved Solids 24-19
 Ion Exchange 24-20; Chemical Treatment 24-21
 Chlorination 24-22
 Process Instrumentation 24-22
 Primary Devices 24-22; Sensors 24-22; Transmission and Reception 24-23;
 Supervisory Control 24-23
 Other Equipment 24-24
 Package Plants 24-24; Tertiary Treatment 24-24

Selection of Processes 24-26
 Economic Considerations 24-27
 Designing for Future Expansion 24-27; Equipment Life and Materials of
 Construction 24-27

**25. Equipment Guarantees, Performance Testing,
 and Startup Procedures 25-1**

Introduction 25-1
 Objectives for Air and Water Pollution Control Equipment Guarantees and
 Agreements 25-2
 Guidelines to Establish Contract Responsibilities and Agreements 25-2
 Air Pollution Control Equipment—Agreements, Guarantees, Performances,
 Testing, Startup, and Maintenance Training 25-3
 Influence and Effects of Accelerated Air Pollution Control Programs 25-3;
 Uncertainties in Limits of Specific Air Pollutant Outlet Loadings with Chang-
 ing Code Regulations 25-4; Why Certain Industries Resist Investing in New
 Air Pollution Control Equipment 25-4; Parties Concerned in Air Pollution
 Control Equipment Guarantees 25-6; Essential Phases to Establish Equip-
 ment Guarantees 25-6; Primary Steps in Evaluation, Setting Requirements,
 Prescribing Guaranteed Performance Specifications, and Installing Dust and
 Fume Collection Systems 25-12; Factors for Evaluation of Air Pollution
 Control Equipment 25-16; Requirements for Accurate, Reliable Sampling
 and Test Data 25-23; Status of Air Pollution Control Testing and Resultant
 Data 25-25; Reasons for Inaccurate, Unreliable Data on Emissions 25-28;
 Contractual Guarantees of Performance of Air Cleaning Equipment 25-28;
 Startup Procedures for Air Pollution Control Equipment 25-31; Examples
 of Erroneous Determinations of Pollutants 25-32; Qualifications of Organiza-
 tions for Sampling and Testing of Emissions 25-33; Costs in Sampling and
 Measuring Airborne Pollutants and Testing Equipment Performances 25-34;
 Summary 25-36
 Water Pollution Control Equipment—Agreements, Guarantees, Performances,
 Testing, Startup, and Maintenance 25-37
 Similarities in Air and Water Pollution 25-39; Dissimilarities between Air
 Pollution and Its Control and Water Pollution and Its Control 25-39; Phases
 of Water Treatment and Handling 25-40; Responsibilities of Specialists or
 Engineering Firms in Surveys, Planning, Design Engineering, and Installing
 of Water Pollution Control Processes and Equipment 25-41; Criteria and
 Factors in Selecting Water Pollution Treatment Methods and Water Pollution
 Control Equipment 25-44; Reuse of Water 25-45; Treatment of Polluted
 Water at Its Source 25-47; Contractual Guarantees Required by the Pur-
 chaser-Owner of Water Pollution Control Systems 25-49; Contractual Con-
 ditions and Guarantees Required by the Contractor 25-51; Summary 25-54

**26. Operating Costs and Procedures of Industrial Air Pollution
 Control Equipment 26-1**

Important Observations 26-3
 Analysis by Industry 26-6
 General Summary 26-11

Glossary follows Chapter 26.

Part 1 Industrial Air Pollution Control Terms 1
 Part 2 Industrial Water Pollution Control Terms 31

Index follows Glossary.
