

# MATHEMATICS FOR ENGINEERS AND SCIENTISTS

*Volume 1*

*Revised Edition*

*A students'  
course book*

A. C. BAJPAI · I. M. CALUS · J. A. FAIRLEY

1/1

## CONTENTS

### UNIT 1 - Differentiation - Foundations, Techniques and Applications

FRAMES		PAGE
<b>FUNCTIONS, LIMITS AND CONTINUITY</b>		
1 - 9	The Idea of a Function	1
10	Function of a Function	4
11 - 14	Limits	5
15 - 24	Evaluation of Limits	8
25 - 26	Continuity	14
27 - 36	Further Ideas on Limits and Continuity	16
37 - 41	Periodic Functions	21
42 - 49	Odd and Even Functions	23
50 - 54	Hyperbolic Functions - Introduction and Definitions	27
55 - 58	Hyperbolic Functions - Graphs	30
59 - 67	Hyperbolic Functions - Identities	32
68	Examples I	35
69	Answers to Examples I	36
70	Inverse Functions	38
71 - 72	Inverse Trigonometric Functions	38
73 - 78	Inverse Trigonometric Functions - Graphs	39
79 - 80	Inverse Hyperbolic Functions and their Graphs	42
81 - 83	Inverse Hyperbolic Functions - Logarithmic Forms	43
84	Examples II	45
85	Answers to Examples II	46
<b>COORDINATE SYSTEMS</b>		
1 - 3	Frames of Reference	49
4 - 11	Cartesian Coordinates - Some Standard Results	50
12 - 14	Cartesian Coordinates - Parametric Equations	56
15 - 23	Cartesian Coordinates - Change of Origin and Rotation of Axes	58
24 - 28	Polar Coordinates	62
29	Miscellaneous Examples	66
30	Answers to Miscellaneous Examples	68

## DIFFERENTIATION AND ITS APPLICATIONS

1-7	The Idea of a Derivative	72
8	Second and Higher Derivatives	75
9	Notations	76
10-18	Revision of Elementary Standard Formulae	76
19-23	Functions in Parametric Form	85
24-28	Implicit Functions	88
29-31	Logarithmic Differentiation	91
32	Examples I	94
33	Answers to Examples I	95
34-39	Inverse Trigonometric Functions	97
40-41	Hyperbolic Functions	102
42-48	Inverse Hyperbolic Functions	103
49-56	Leibnitz' Theorem	105
57	Examples II	108
58	Answers to Examples II	110
59-60	Example involving Leibnitz' Theorem	112
61	Examples III	112
62	Answers to Examples III	113
63-70	The Newton-Raphson technique for solving a polynomial or transcendental equation	115
71-84	Maxima and Minima and Points of Inflexion	117
85-90	Curve Sketching	127
91	Miscellaneous Examples	132
92	Answers to Miscellaneous Examples	134
APPENDIX Table of Standard Derivatives		140

### INFINITE SERIES

1-2	Introduction	142
3-5	Convergence	143
6-9	Ratio Test	145
10-22	Maclaurin's Series	147
23-24	Maclaurin's Series - Use of Leibnitz' Theorem	152
25-31	Manipulations with Series	154
32-35	Use of Series for Approximations	159
36-41	Taylor's Series	162
42-45	Approximations using Taylor's Series	165
46	Taylor's Series applied to Stationary Values	167
47-48	General Remarks on Taylor's Series	168
49-55	Use of Series in obtaining Limits: l'Hopital's Rule	170
56	Miscellaneous Examples	174
57	Answers to Miscellaneous Examples	177

## PARTIAL DIFFERENTIATION

1–5	Functions of Two Variables	181
6–9	Partial Derivatives	183
10–12	Second Partial Derivatives	186
13	Notations	188
14–23	Small Increments and Errors	188
24–30	Total Derivative – Rates of Change	194
31–33	Differentials	198
34–35	More about Notations	199
36	Miscellaneous Examples	200
37	Answers to Miscellaneous Examples	203

UNIT 1 – Revision Examples and Answers	208
--	-----

## UNIT 2 – Integration – Foundations, Techniques and Applications

### INTEGRATION

1–16	Introduction	215
17–19	Revision of Elementary Forms	223
20–24	Integration by Substitution	225
25–40	Integration by Parts	230
41	Examples I	238
42	Answers to Examples I	239
43–48	Integration by Partial Fractions	240
49–57	Integration of Fractions of the form $\frac{ax + b}{px^2 + qx + r}$	243
58–59	Principal Values	247
60–62	The 't' Substitution	247
63–64	Some Further Standard Results	249
65–71	Some Miscellaneous Substitutions	250
72	Examples II	254
73	Answers to Examples II	254
74–85	Reduction Formulae	255
86–87	Use of Series in Integration	262
88–92	Numerical Integration	264
93	Miscellaneous Examples	267
94	Answers to Miscellaneous Examples	271

APPENDIX Standard Integrals	279
-----------------------------	-----

## APPLICATIONS OF INTEGRATION

1-6	Introduction	281
7-13	Volumes of Solids of Revolution	284
14	The Length of an Arc	288
15-19	The Curved Surface Area of a Solid of Revolution	290
20	Examples I	292
21	Answers to Examples I	293
23-35	First Moments and Centres of Gravity	296
36	Examples II	305
37	Answers to Examples II	306
38-49	Second Moments (including Moments of Inertia)	309
50-56	The Parallel and Perpendicular Axes Theorems	314
57	Examples III	318
58	Answers to Examples III	318
59-63	Mean Values and Root Mean Square Values	321
64-65	Polar Coordinates	324
66	Some Miscellaneous Applications	326
67	Miscellaneous Examples	327
68	Answers to Miscellaneous Examples	329

## PARTIAL FRACTIONS

1-3	Introduction	336
4-7	Identities	337
8-23	Linear Factors	338
24-30	Repeated Linear Factors	343
31-35	Non-Linear Factors	346
36	Improper Fractions	348
37	Summary	349
38	Miscellaneous Examples	350
39	Answers to Miscellaneous Examples	351

## UNIT 2 - Revision Examples and Answers

353

## UNIT 3 - Determinants, Matrices and Vectors

### DETERMINANTS

1-4	Introduction	360
5-14	Evaluation of Determinants	362
15-31	Properties of Determinants	367
32	Examples I	372

33	Answers to Examples I	373
34–37	Solution of Simultaneous Linear Equations	375
38–49	Consistency and Linear Dependence	377
50–55	Homogeneous Equations	384
56	Examples II	386
57	Answers to Examples II	388

## VECTOR ALGEBRA

1–4	Scalars and Vectors	391
5–8	Addition and Subtraction of Vectors	392
9	Scalar Multiple of a Vector	394
10–16	Unit Vectors	394
17	Worked Examples	397
18	Examples I	398
19	Answers to Examples I	399
20–28	Scalar and Vector Products	402
29	Moment of a Force	407
30	Worked Examples	408
31	Examples II	410
32	Answers to Examples II	411
33–50	Triple Products	413
51	The Idea of an $n$ -dimensional Vector	420
52	Miscellaneous Examples	421
53	Answers to Miscellaneous Examples	422

APPENDIX A	Introduction to Three-Dimensional Coordinate Geometry	424
------------	---	-----

APPENDIX B	Proofs of some Scalar Product Results	426
------------	---------------------------------------	-----

APPENDIX C	Proofs of some Vector Product Results	427
------------	---------------------------------------	-----

## MATRICES I

1–3	Introduction	428
4	Equality of Matrices	429
5–8	Addition and Subtraction	430
9–20	Multiplication	432
21–29	Some Special Matrices	439
30–41	The Inverse of a Matrix	443

42	Examples	449
43	Answers to Examples	451
44-45	Simultaneous Linear Equations	452
46-56	Solution of Simultaneous Linear Equations	454
57-64	Rank and Row-Equivalence	459
65-74	Transformations	463
75	Miscellaneous Examples	467
76	Answers to Miscellaneous Examples	471

UNIT 3 - Revision Examples and Answers	473
--	-----

#### UNIT 4 - Complex Numbers

1-8	Introduction	481
9-11	Complex Numbers and the Argand Diagram	484
12-13	Real and Imaginary Parts of a Complex Number	485
14-15	Modulus and Argument	486
16-17	Polar Form of a Complex Number	489
18	Equality of Complex Numbers	490
19-24	Arithmetic Operations on Complex Numbers in Cartesian Form	491
25-29	Arithmetic Operations on Complex Numbers in Polar Form	496
30-39	De Moivre's Theorem	500
40	Branching Instruction	505
41-52	Applications of Complex Numbers to Alternating Currents	505
53-61	The Exponential Form of a Complex Number	512
62-66	Relationship between Trigonometric and Hyperbolic Functions	516
67-69	Integration Examples	518
70	Certain Trigonometric Formulae	520
71	Summary	520
72	Miscellaneous Examples	521
73	Answers to Miscellaneous Examples	523

APPENDIX	To express $\cos n\theta$ and $\sin n\theta$ in powers of sines and cosines	527
----------	---	-----

	To express $\cos^n \theta$ and $\sin^n \theta$ in terms of multiple angles	527
--	--	-----

UNIT 4 - Revision Examples and Answers	529
--	-----

## UNIT 5 - Ordinary Differential Equations

### FIRST ORDER DIFFERENTIAL EQUATIONS

1	Introduction	533
2-17	Definitions and Classifications	534
18	Types of First Order Differential Equations	539
19-39	Type I - Variables Separable	539
40-50	Type II - Homogeneous	550
51-64	Type III - Linear	556
65-75	Type IV - Exact	565
76-77	Miscellaneous Examples	571
78	Answers to Miscellaneous Examples	574

### DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS - SOLUTION BY TRIAL AND D-OPERATOR METHODS

1-5	Introduction	577
6	Definition	578
7-17	Forms of Solution	579
18-31	Complementary Function	583
32-44	Particular Integral	590
45	Cases of Failure	597
46-48	Boundary Conditions	598
49-52	Applications	599
53	Summary	602
54	Miscellaneous Examples I	603
55	Answers to Miscellaneous Examples I	603
56-57	Introduction to D-Operator	604
58	Definition	605
59-62	Fundamental Laws	606
63	Inverse Operator	607
64-68	Operation of $f(D)$ on Certain Functions	608
69-82	Finding the Particular Integral	610
83-88	Particular Integral - Cases of Failure	621
89	Use of second order techniques for the first order equation $b\frac{dy}{dx} + cy = Q$	625
90-93	Applications	625
94	Summary	630
95	Miscellaneous Examples II	630
96	Answers to Miscellaneous Examples II	632

## DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS – SOLUTION BY LAPLACE TRANSFORM METHODS

1-3	Introduction	635
4-6	Definition	636
7	Inverse Laplace Transform	638
8	Alternative Notations	638
9-10	Transform of $t^n$	638
11, 14	Some Properties of the Laplace Transform	640
12-13,		
15, 19	Transforms of Further Functions	640
16-18	Use of the Table of Transforms	643
20-23	Use of Partial Fractions in finding Inverse Transforms	647
24-25	Transforms of Derivatives	648
26-35	Solution of Differential Equations	650
36-39	Applications	656
40	Miscellaneous Examples	659
41	Answers to Miscellaneous Examples	662
<b>APPENDIX Table of Laplace Transform Pairs</b>		666

## SIMULTANEOUS DIFFERENTIAL EQUATIONS – SOLUTION BY D-OPERATOR AND LAPLACE TRANSFORM METHODS

1-4	Introduction	668
5-15	Examples solved by D-Operator Method	670
16	Remarks on the Number of Arbitrary Constants	679
17-18	Applications using D-Operator Method	680
19	Branch Instruction	682
20-30	Examples solved by Laplace Transform Method	682
31-32	Applications using Laplace Transform Method	690
33	Advantages of Laplace Transform Method	693
34	Miscellaneous Examples	693
35	Answers to Miscellaneous Examples	695
<b>UNIT 5 – Revision Examples and Answers</b>		702
<b>INDEX</b>		708
