The Department of Computer & Information Science

The evolving ethernet

Alexis Ferrero

Addison-Wesley

Contents

Introduction	1
Part I: The world of telecommunications	9
1 The standardization bodies	11
1.1 Aims	12
1.2 The main bodies	11
1.3 The stages of standard documents	13
2 The OSI model	15
2.1 Introduction to the model	16
2.2 The lower layers	19
2.3 The higher layers	21
2.4 Other models	31
3 Data communication networks	35
3.1 Machine bus	37
3.2 LAN	37
3.3 MAN	38
3.4 HSLAN	39
3.5 WAN	40
4 Local area networks	43
4.1 Definition of local area networks	44
4.2 The physical media	44
4.3 The topologies	53
4.4 Multiplexing	59
4.5 Access methods	61

vi Contents

4.6	Encoding and transmission	65
4.7	Local area network rivals to Ethernet	68
4.8	The place of local area networks in telecommunications	72
5	Current trends	73
Part II: Ethernet		79
6	History and evolution of the standard	81
6.1	Ethernet	82
6.2	The IEEE 802.3 standard	83
6.3	The ISO 8802-3 standard	93
7	Access method	95
7.1	The CSMA/CD principle	96
7.2	Operation of the MAC	97
8	Physical layer	101
9	Packet formatting and errors	105
9.1	The frame	106
9.2	Defective frames	115
9.3	Collision	118
9.4	The idle signal	122
10	Elements of the network	125
10.1	The medium	126
10.2	Transceivers	136
10.3	The AUI cable	142
10.4	The MII interface	144
10.5	The interface card	147
10.6	Repeaters	149
10.7	Test equipment	160
11	Interconnection possibilities	173

11.1	MAC bridges	174
11.2	Connection to networks of other types	195
11.3	Terminal servers	204
12	The main figures to remember	207
13	Critical situations	211
14	Technical developments	215
14.1	Switching	217
14.2	Ethernet at 100 Mbps	223
14.3	IsoEthernet	240
14.4	Full duplex	242
14.5	Daisy chain	243
Part III: Engineering and maintenance of a network		245
15	Stages	249
15.1	Study	252
15.2	Installation	268
15.3	On-site monitoring	271
15.4	Acceptance operations	272
15.5	Evolutions and modifications	276
15.6	Maintenance operations	277
15.7	Management	281
15.8	Security and privacy	291
16	Human resources	295
16.1	Useful knowledge	296
16.2	Day-to-day procedures	296
17	Documents and materials	301
17.1	Documentation	302
17.2	Test equipment	309
