CONTENTS

Preface	v
Chapter 1. Heat Capacity of Polymers at Low Temperatures	1
1.1. Basic Concepts of the Heat Capacity of Solids	1
1.2. Basic Concepts of the Heat Capacity of Polymers	8
1.3. Methods of Measuring Heat Capacity	17
1.4. The Heat Capacity of Polymers	20
1.4.1. The Heat Capacity of Crystalline Polymers	23
1.4.2. The Heat Capacity of Amorphous Polymers	34
Chapter 2. Thermal Conductivity of Polymers at Low Temperatures	45
2.1. Basic Concepts of the Thermal Conductivity of Dielectrics	45
2.2. Methods of Measuring the Thermal Conductivity of Polymers	56
2.3. Thermal Conductivity of Polymers at Low Temperatures	57
2.3.1. Thermal Conductivity of Crystalline Polymers	65
2.3.2. Thermal Conductivity of Amorphous Polymers	76
Chapter 3. Thermal Expansion of Polymers at Low Temperatures	82
3.1. Thermal Expansion of Solids	82
3.2. Equations of State for Solids	83
3.3. Basic Concepts of the Thermal Expansion of Polymers	86
3.3.1. Thermal Expansion of Amorphous Polymers	86
3.3.2. Thermal Expansion of Crystalline Polymers	94
3.4. Methods of Measuring Thermal Expansion Coefficients of Polymers	95
3.5. Thermal Expansion Coefficients of Polymers	97
Chapter 4. Electrical Properties of Polymers at Low Temperatures	110
4.1. Basic Concepts of the Electrical Properties of Polymers	110
4.2. Dielectric Constants of Solids	112
4.3. Phenomenological Relaxation Theory of the Dielectric Properties of Polymers	113
4.3.1. Basic Equations	113
4.3.2. Dielectric Properties of a System with a Single Relaxation Time	117
4.3.3. Temperature Dependence of Dielectric Properties	118
4.4. The Mechanism of Dielectric Relaxation	120
4.5. Methods of Studying the Dielectric Properties of Polymers	124
4.6. Dielectric Properties of Polymers	126
Chapter 5. Nuclear Magnetic Resonance in Polymers at Low Temperatures	147
5.1. Basic Concepts of Nuclear Magnetic Resonance in Polymers	147
5.2. Effect of the Structure and Composition of Polymers on Nuclear Magnetic Resonance	154

5.2.1. Effect of the Degree of Crystallinity on the NMR Linewidth	154
5.2.2. Effect of the Degree of Cross-Linking on the NMR Linewidth	158
5.2.3. Effect of Plasticizer Concentration on the NMR Signal Linewidth in Plasticized Polymers	161
5.2.4. Effect of the Structure and Composition of Polymers on the Second Moment and the Spin-Lattice Relaxation Time	163
5.3. Investigation of the Molecular Motion in Polymers at Low Temperatures by the NMR Method	164
5.3.1. Quantum-Mechanical Tunnelling Transitions in Polymers Containing Methyl Groups	164
5.3.2. Nuclear Magnetic Resonance in Polymers Containing Methyl Groups	167
Chapter 6. Dynamic Mechanical Properties of Polymers at Low Temperatures	178
6.1. Effect of Chemical Constitution, Structure, and Composition on the Dynamic Mechanical Properties of Polymers. Basic Concepts of Acoustic Spectroscopy of Polymers	178
6.2. Methods of Investigating the Dynamic Mechanical Properties of Polymers	183
6.3. Relaxation Processes in Polymers at Low Temperatures	184
6.3.1. The Mechanism of Viscoelastic Relaxation in Polymers Containing Methyl Groups	20
Chapter 7. The Acoustical Properties of Polymers at Low Temperatures	
7.1. Propagation of Ultrasonic Waves in Dielectrics	206
7.2. The Phenomenological Theory of Sound Propagation in Polymers	208
7.3. Experimental Methods of Acoustical Measurements in Polymers	211
7.4. Ultrasonic Velocity and Relaxation Processes in Polymers	216
7.5. Ultrasonic Velocity and Relaxation Processes in Linear Crystalline Polymers at Helium Temperatures. The Low-Temperature Plateau	218
7.6. Ultrasonic Velocity and Relaxation Processes in Polymers Containing Methyl Groups	228
7.7. Ultrasonic Velocity and Relaxation Processes in Polymers with an Asymmetric Potential Barrier	232
7.8. Effect of Structure on Acoustical Properties	236
Chapter 8. Viscoelastic Parameters of Polymers at Low Temperatures	241
8.1. Determination of the Main Viscoelastic Parameters of Polymers from Acoustic Measurements	241
8.2. Dynamic Elastic Moduli of Polymers	243
8.3. Poisson's Ratio for Polymers Near the Liquid-Helium Temperature	249

CONTENTS

ix

Chapter 9. Determining the Thermophysical Characteristics of Polymers by Acoustic Measurements at Helium Temperatures	255
9.1. Debye Temperatures and Heat Capacities Determined by Acoustic Measurements	255
9.2. Determining the Thermal Expansion Coefficients and Grüneisen Constants from Acoustic Measurements	261
Appendix. Some Thermophysical, Dielectric, Viscoelastic and Acoustical Parameters of Polymers at Low Temperatures	268
References	275
Name Index	285
Subject Index	292
