Reusable Software

*The Base Object-Oriented  
Component Libraries*

## Short table

Preface	vii
<b>Part A: Techniques and principles</b>	
1 Introduction to the Base libraries	3
2 Building libraries: techniques	11
3 Principles of library design	61
<b>Part B: Presentation of the libraries</b>	
4 Abstract container structures: the taxonomy	123
5 Mathematical properties	135
6 Linear structures: sequences, chains, lists, circular chains	139
7 Dispenser structures: stacks, queues, priority lists	159
8 Trees	163
9 Sets and hash tables	173
10 Iteration	181
11 Lexical analysis: the Lex library	201
12 Parsing: The Parse Library	219
13 The Kernel Library	243
<b>Part C: Class reference</b>	
14 Classes for abstract container structures	263
15 Classes for mathematical properties	287
16 Classes for linear structures	291
17 Dispenser classes	331
18 Tree classes	349
19 Set and hash table classes	379
20 Iteration classes	393
21 Lexical analysis classes	403
22 Parsing classes	413
23 Kernel library classes	425
Bibliography	475
Index	477
