

# Principles of Environmental Toxicology

Second Edition  
Sigmund F. Zakrzewski

ACS Monograph  
**190**

# Contents

<b>Preface to the First Edition</b>	<b>ix</b>
<b>Preface to the Second Edition</b>	<b>xiii</b>
<b>1. Environment: Past and Present</b>	<b>1</b>
Historical Perspective	1
Present State of the World	6
The United Nations Conference on Environment and Development	10
Antienvironmental Movements in the United States	12
<b>2. Review of Pharmacologic Concepts</b>	<b>15</b>
Dose-Response Relationship	15
The Concept of Receptors	21
Mode of Entry of Toxins	22
Translocation of Xenobiotics	27
<b>3. Metabolism of Xenobiotics</b>	<b>35</b>
Phases of Metabolism	35
Phase I Biotransformations	36
Disposition of Epoxides	39
Conjugations (Phase 2)	40
Glutathione	43
Induction and Inhibition of P-450 Isozymes	45
Activation of Precarcinogens	51
<b>4. Factors That Influence Toxicity</b>	<b>57</b>
Selective Toxicity	57
Metabolic Pathways	58
Enzyme Activity	58

Xenobiotic-Metabolizing Systems	60
Toxicity Tests in Animals	61
Individual Variations in Response to Xenobiotics	63
<b>5. Chemical Carcinogenesis and Mutagenesis</b>	<b>67</b>
Environment and Cancer	67
Multistage Development of Cancer	69
Types of Carcinogens	71
Review of DNA and Chromosomal Structure	72
Mutagenesis	78
Interaction of Chemicals with DNA	80
DNA Repair Mechanism	88
Xenoestrogens	88
Carcinogenic Effect of Low-Frequency Electromagnetic Fields	89
<b>6. Risk Assessment</b>	<b>93</b>
Hazard Assessment	93
Dose-Response Assessment	99
Exposure Assessment	102
Risk Characterization	103
Critique of Risk Assessment	104
Ecological Risk Assessment	105
<b>7. Occupational Toxicology</b>	<b>107</b>
Threshold Limit Values and Biological Exposure Indices	107
Respiratory Toxicity	108
Irritation of Airways and Edema	109
Pulmonary Fibrosis	111
Pulmonary Neoplasia	112
Allergic Responses	113
Nephrotoxins	117
Liver Damage	122
Other Toxic Responses	126
<b>8. Air Pollution</b>	<b>129</b>
Pollutant Cycles	129
Urban Pollutants: Their Sources and Biological Effects	129
Trends and Present Status of Air Quality	139
Pollution by Motor Vehicles	143
Pollution by Industrial Chemicals	145
Pollution by Incinerators	150
Tall Stacks and Their Role in Transport of Pollutants	151
Indoor Air Pollution	151

<b>9. Pollution of the Atmosphere</b>	<b>157</b>
The Earth's Atmosphere	157
Formation and Sustenance of Stratospheric Ozone	160
Depletion of Stratospheric Ozone	161
Emission of CO <sub>2</sub> and Models of Climatic Changes	167
Current Developments	175
<b>10. Water and Land Pollution</b>	<b>181</b>
Freshwater Reserves	181
Sources of Water Pollution	182
Urban Pollutants	182
Lead Pollution	185
Soil Erosion	186
Nutrients and Pesticides	188
Wetlands and Estuaries	196
Industrial Pollutants	199
Pollution of Groundwater	209
Airborne Water and Land Pollution	211
<b>11. Pollution Control</b>	<b>219</b>
Clean-Coal Technology	219
Control of Mobile-Source Emission	223
Control of Nitrogen Oxides	227
Energy Conservation	228
Wastewater Treatment	229
Waste Disposal and Recycling	232
Hazardous Waste	240
<b>12. Radioactive Pollution</b>	<b>245</b>
Ionizing Radiation	245
Measurement of Radioactivity	247
Sources of Radiation	248
Health and Biological Effects of Radiation	250
Nuclear Energy	253
<b>13. Population, Environment, and Women's Issues</b>	<b>265</b>
Present Trends in Population Growth	265
Effect of Overpopulation on the Environment	271
Overpopulation, Urban Sprawl, and Public Health	274
International Cooperation on Population Issues	276
<b>14. Regulatory Policies and International Treaties</b>	<b>279</b>
The National Environmental Policy Act	279

280	Environmental Regulatory Framework	280
282	EPA and Its Responsibilities	282
294	OSHA and Its Responsibilities	294
295	Miscellaneous Environmental Acts and Treaties	295

<b>299</b>	<b>Appendix. Subjects for Student Seminars</b>	<b>299</b>
<b>301</b>	<b>Index</b>	<b>301</b>
