Contents

Preface and Acknowledgements viii

Introduction 1

1 *Urban Design as the Organization of Space, Time, Meaning and Communication* 8

The meaning of space 12

Rules of organization 14

The choice model of design 15

Cultural variability of urban environments 21

The role of values in design 24

Environmental perception 25

The perceived environment 28

The excessively broad meaning of "perception" in the literature 30

Evaluation, cognition and perception 31

The distinction between evaluation, cognition and perception in the urban environment – an example 34

Pros and cons of making these distinctions 36

The filter model 38

The general concept of image and schema 40

The development of the concept of image 42

2 *Perception of Environmental Quality – Environmental Evaluation and Preference* 48

Components of environmental quality 60

Habitat selection and migration in response to environmental preference 81

The variability of standards 91

The problem of "slums" 96

Squatter settlements 100

3 *Environmental Cognition* 108
Urban images 114
Cognitive schemata and mental maps 118
The construction of mental maps 129
Orientation 142
The subjective definition of areas 149
Subjective distance – space and time 169
Subjective urban morphology 174

4 *The Importance and Nature of Environmental Perception* 178
The multisensory nature of perception 184
Information approaches – sensory deprivation and overload 195
Density and privacy in sensory terms 201
Environmental complexity 207
The notion of noticeable differences 220
Effects of scale and speed of movement 240

5 *The City in terms of Social, Cultural and Territorial Variables* 248
Clustering and urban enclaves 249
Socio-cultural aspects of the city 265
The relevance of ethological concepts in the city 277
Public and private domains 289
Behavior setting system 298
The house-settlement system 305

6 *The Distinction Between Associational and Perceptual Worlds* 316
Symbolism and the urban environment 319
Environment as communication 325
Culture, symbols and form as ways of coping with overload 333
Cross-cultural view of the city – differences in form and cultural landscapes 345
Designing for cultural pluralism 355
The involvement of people in their environment and its consequences 368
